

Parts List

- 1 – seat cushion
- 1 – mounting plate
- 4 – 1/2" screws
- 1 – pneumatic cylinder
- 1 – pedestal base
- 5 – pedestal feet

Step One

Remove all the parts from the carton and make certain you have all the items in the parts list above and in the correct quantity.

Step Two

Insert the pedestal feet into the pedestal base. Be sure all feet are inserted securely.

Step Three

Insert the pneumatic cylinder into the pedestal base.

Step Four

Attach the mounting plate to the seat cushion using the four 1/2" screws. Tighten the screws firmly.

Step Five

Push the mounting plate and the seat cushion down onto the pneumatic cylinder until it is secure.

To adjust the seat height, pull up on the lever and either push down on the seat to lower or pull up to raise the height. Make certain all screws are tightened fully before using this stool.
