

**GP-H56S/P/EX  
LED Light  
Instruction Manual**

Thank you for your choice in purchasing a Switronix Product. The *PRO-X* series GP-H56 will provide ample on camera lighting while limiting the amount of drain on the battery, subsequently offering extended runtimes.

Features:

- Incorporating the latest in LED technology and a unique optical design, the GP-H56 is a revolutionary product. Features include a smaller and brighter design than any other similar products on the market.
- 16w power consumption can product the same illumination as traditional 100w halogen bulbs. A 10,000 hour operating life eliminates the need to carry fragile, spare filament bulbs.
- 5600k color temperature.
- Wide range voltage design allows the unit to be powered from a Sony L-Series(S Model), Panasonic CR Series(P model) or Series 7(adapter required) battery or with the included P-Tap cable, the light accepts voltages up to 17vdc.
