How to Assemble Your Flash Accessory

We're demonstrating with a Snoot, but the same procedure works for the Dome Diffuser and the Beauty Dish.

First feed the strap through the slots on the mount. The touch fastener side should face out. **1**

Continue feeding the strap around to the slot on the opposite side. **2**

The Velcro pads prevent slippage. There are multiple sizes—determine what pair will fit your flash, and attach them to the opening of the accessory as shown. **3**

Insert your flash into the opening of the accessory. Take care to place the flash head well into the opening of the accessory. **4**

Feed the strap through its buckle. Pull the strap to tighten its grip on the flash. Then fold the strap back onto its touch fastener and press down to lock in place. **5**
