

Red Filter Installation Instructions: for Intova thread mount red filters model# IFRed and IFRED 52.

1. Before installing red filter to lens port, be sure threads are clean and free of debris.

2. If installing a new filter, remove protective film from front and back of filter.

3. Hold camera and filter with a comfortable and steady grip.

4. Position filter so that it is "square" and evenly placed on lens port ring.

5. With even pressure, turn filter clockwise to screw into lens port ring. Do not over screw (half turn is sufficient) or use force.

6. Installation complete.

CAUTION: Improper installation will not be covered under warranty.
