Introducing the Tracking Key® II

The 2015 release of Tracking Key® II, while staying true to the classic look and “no monthly fee” concept, delivers massive performance component upgrades, and LandAirSea’s new Flashback® software. The highly anticipated launch of Flashback® opens a door to Mac & PC users alike with an innovative new cloud-based platform for managing logged GPS Tracking data.

What's new?

Flashback®

- Cloud based software
- Mac & PC compatible
- Import, review and store GPS Tracking data in the Flashback cloud
- 24/7 online access to data
- No software download required
- Enhanced mapping powered by Google Earth
- Sleek new user interface

8th Generation GPS Module

- Super-charged GPS signal reception
- Enhanced overall tracking performance
- Receives signal from the US Department of Defense, Russian GLONASS and Chinese BeiDou satellites orbiting the earth

+Battery Life

- 2 AA batteries replace the traditional 2 AAA format
- 30+ continuous drive time hours
- Improved motion sensor further conserves battery life when idle

How does it work?

Tracking Key® II is a water resistant, magnet mount equipped GPS Vehicle Tracking device lending itself to placement inside or outside (exterior) of a vehicle.

2 AA batteries are needed to power the device (not included) which, once powered and placed, records the entire movement history of a vehicle to it's 100+ hour capacity internal flash drive.

Reviewing recorded data is as simple as retrieving the device and importing files directly to the Flashback® cloud (USB cable included) where it is stored for 2 weeks and accessible on-demand via LandAirSea password protected online user account.

Export and/or save data files to a computer as needed, or opt for unlimited Flashback® cloud storage for \$35.

Second-to-second, reviewable captured data is time-stamped and includes all routes and speeds traveled; duration, coordinates and physical addresses of stops w/ street level view; mileage; active drive time.

Who needs this?

Tracking Key® II is an essential tool for parents in monitoring teen driver behavior, business owners/ supervisors proactively seeking improvements in field staff accountability and customer service, and outdoor enthusiasts interested in mapping an adventurous route traveled by Land, Air or Sea.

What Else?

- No monthly fees
- Featured on AMC's hit TV series Breaking Bad
- Second-to-second vehicle route & speed capture
- Historical route playback feature re-animates routes traveled over a digital street map
- Pause/play, rewind/forward, speed up/ slow down playback user controls
- Configurable satellite, traditional road map, 3D split screen views
- On-demand stops reports
- Works internationally
- Made in the USA
- 24/7 tech support
- 1 year manufacturer warranty
