Bluetooth Information

Bluetooth is a short-distance two-way wireless communication technology capable of transmitting data, commands, and audio between devices. The AF32 can connect with many devices such as mobile phones, tablets, PDAs, computers, media players, and more through a process called pairing. Before you can use your AF32 with your device, they will need to be paired.

Warning

Please Read: Important Safety Information to Avoid Personal Injury!

Statistics show that using headphones while walking, jogging, or running in areas with moving vehicles or trains significantly increases the potential of accident which leads to personal injury or death.

We strongly discourage using headphones while walking, jogging, running, cycling, driving, operating machinery, or performing other activities that require hearing surrounding sounds.

Do not use headphones at high volumes for extended periods of time as doing so will result in permanent hearing damage. It is advised that you keep volume levels moderate to low at all times for your safety.

Please visit www.osha.gov for more info.

Safety Guide

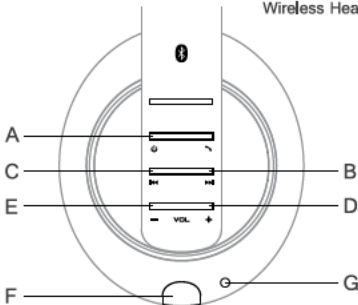

- a) When using your headset while driving, please follow the local regulations of your country or region and do not place both headphones in your ears.
- b) Do not use your headset around flammable gases as fire or explosion may occur.
- c) There are no user replaceable/reparable parts in the headset. Disassembling it will void your warranty.
- d) Do not expose the headset to moisture, water, or other liquids. Doing so will void your warranty.
- e) Keep the device and packaging out of the reach of children.

Product Features

- A multifunction button (power, play, stop, call, end)
- B next button
- C previous button
- D volume up button
- E volume down button
- F wired headphone jack / charging jack
- G built-in microphone

AF32 Stereo Bluetooth
Wireless Headphones

Charging

The headset has a built-in rechargeable Lithium battery.

***** You must charge the headset for at least 4 hours before the first use *****

- a) Locate the charging cable which has a USB connector on one side and a 4 pin 3.5mm connector on the other side.
- b) Connect the USB charging cable to a powered USB source such as a wall charger, powered-on computer, or powered USB hub.
- c) Connect the 3.5mm plug to the headset.
- d) The Red indicator light will stay on while the unit is charging. Charge time is approximately 2 hours. When the battery is almost full, the indicator will blink red.
- e) When the battery is fully charged the red indicator light will turn off.

***** Note: the AF32 cannot be turned on while charging. Please wait before it is charged to use or pair *****

Turning On and Off

- a) To turn on, press and hold the Multifunction button for about 4 seconds. There will be an audible beep and the blue indicator light will flash to show the power is on. The blue light will continue to flash while the unit is on.
- b) To turn off, press and hold the Multifunction button for about 3 seconds. There will be an audible beep and the red indicator light will flash 3 times to indicate the unit is powering down.

Pairing

*** It is only necessary to pair your AF32 once with each device ***

iPhone, iPad, and iPod Touch

- a) On your iPhone/iPad/iPod Touch, go to Settings
- b) Select General
- c) Select Bluetooth
- d) Make sure the headset is off
- e) On your AF32 headset, press and hold the Multifunction button for about 7 seconds, until the blue and red lights flash in an alternating manner
- f) On your iPhone/iPad/iPod Touch, turn Bluetooth on
- g) Your iPhone/iPad/iPod Touch will now find your AF32 headset. Once it has been found, you should see the device, but indicate not paired
- h) Tap on "AF32" on the screen of your device to pair and connect your iPhone/iPad/iPod Touch to the headset

When the headset is connected to your device, the Blue indicator light will flash every 2 seconds.

Android Phones and Tablets

- a) On your Android phone or tablet, navigate to the Settings menu
- b) Select Wireless & Networks
- c) Make sure the headset is off
- d) On your AF32 headset, press and hold the Multifunction button for about 7 seconds, until the blue and red lights flash in an alternating manner
- e) Make sure Bluetooth is enabled
- f) Select Bluetooth Settings
- g) Your Android device will now find your AF32 headset. If it is not automatically found, select Scan for devices. Once it has been found, select "AF32" in the list of Bluetooth devices to pair and connect

When the headset is connected to your device, the Blue indicator light will flash every 2 seconds.

Pairing cont.

*** It is only necessary to pair your AF32 once with each device ***

Blackberry Phones

- a) Go to Settings in your Blackberry
- b) Select Set Up Bluetooth
- c) Make sure the headset is off
- d) On your AF32 headset, press and hold the Multifunction button for about 7 seconds, until the blue and red lights flash in an alternating manner,
- e) On your Blackberry, select the Search button and wait for the Blackberry to finish searching
- f) You should see an alternating "Audio device" and "AF32" below the Find: bar; select to pair.
- g) Once paired, you will see "Pairing complete. Connect to AF32?" Select yes. You can also check the box for "Don't ask this again" so the headset will automatically pair with the AF32 when the AF32 is on and within range, and the Blackberry has Bluetooth enabled.

When the headset is connected to your device, the Blue indicator light will flash every 2 seconds.

Other Devices

note: non-A2DP Bluetooth devices are not able to stream music and have limited control functionality

- a) Make sure the headset is off
- b) On your AF32 headset, press and hold the Multifunction button for about 7 seconds, until the blue and red lights flash in an alternating manner,
- c) Activate the Bluetooth feature on your device and set it to search for Bluetooth devices.
- d) Select "AF32" from the list of founded devices on your device,
- e) If prompted, enter the pass code 0000 to pair and connect the headset to your device,

When the headset is connected to your device, the Blue indicator light will flash every 2 seconds.

Connecting

***** The AF32 must have been paired with your device before you can connect. Pairing only needs to be done before the first use *****

iPhone, iPad, and iPod Touch

- a) Make sure Bluetooth on your iPhone is on
- b) Turn on the headset by pressing the power button for 5 seconds
- c) Your headset should automatically pair when turned on within range. If it does not pair automatically, tap the Multifunction button once to connect

Android Phones and Tablets

- a) Make sure Bluetooth on your Android phone is on
- b) Turn on the headset by pressing the power button for 5 seconds
- c) Your headset should automatically pair when turned on within range. If it does not pair automatically, tap the Multifunction button once to connect

Blackberry Phone

- a) Make sure Bluetooth on your Blackberry phone is on
- b) Turn on the headset by pressing the power button for 5 seconds
- c) On the Blackberry phone, if your phone has been set to automatically connect, it will connect. Otherwise it will prompt you to connect to the headset.

Other Devices

- a) Make sure the Bluetooth on your device is on
- b) Turn on the headset by pressing the power button for 5 seconds
- c) If your device does not automatically connect, press the Multifunction button once to connect.

Controlling Phone Calls

- a) **Receiving a call:** Press the Multifunction key once to accept an incoming call.
- b) **Ending a call:** Press the Multifunction key once to end a call in progress.
- c) **Making a call:** When you make a call using the handset, the call may be transferred to your headset automatically, depending on the phone setup. If your phone does not support this function, a short press the Multifunction key will transfer the call to the headset.
- d) **Voice call activation*:** If your phone supports this feature, press and hold the multifunction key for about 2 seconds to activate voice dialing when no call is in progress. Proceed as described in the phone user guide.
- e) **Redialing the last number*:** If your phone supports this feature with the headset, when no call is in progress press the Multifunction key twice in short succession to redial the number you last called
- f) **Rejecting a call*:** Press the Multifunction key twice to reject an incoming call.
- g) **Volume control*:** Press either volume key to adjust the volume.

* The functions marked with an * must be supported by your device. For more information, refer to the user manual for your device.

If you answer or make a call while listening to the music, the music will pause until you end the call.

Controlling Audio / Video

- a) Play or Pause: press the Multifunction button
- b) Replay the song/previous track: Press the Previous button, You may have to press the button twice to go to the previous song depending on your device and how long the track has been playing
- c) Next track: Press the Next button
- d) Increase volume: Press the Volume up button
- e) Decrease volume: Press the Volume down button

There will be a beep if you continue to press the button after reaching the maximum or minimum volume level. Volume is also controlled by your connected device.

Using as a Wired Headphone

You can use the headset as a wired headphone by plugging the included audio cable with a 3.5mm plug on both ends to a compatible audio device. If the headset is connected via Bluetooth, connecting the plug to the headset will turn off the Bluetooth function.

Maintaining Your AF32

- a) When not in use, power the device off and store the AF32 in the included protective bag.
- b) Avoid extreme temperatures (45°C/113°F and above, including direct sunlight or -10°C/14°F below) for storage as they will shorten the service life of the battery.
- c) If the device comes in contact with liquids, quickly wipe away. If submersed in water, do not turn the device on until completely dried.

Note: liquid submersion voids the warranty.

Specifications

Bluetooth Specification	V2.1+EDR with Handsfree Profile 1.5., HeadsetProfile1.1 and A2DP profile1.2(Class11)
Driver size	40 mm
Frequency response	20 Hz to 20 kHz
Standby time	100 hours
Talking time	10 hours
Music playing time	12 hours
Effective distance	up to 10 meters
Weight	110g
Certification	CE; FCC; ROHS; BQB

Troubleshooting

Issue	Resolution
Cracking Noise, Static, Interference	Make sure you are within range of your Bluetooth-enabled device
No Sound or Low Volume	Adjust the volume on your headset and device as both control the sound
Not Charging	Make sure the USB plug on the charging cable is plugged into a powered USB hub/USB power adapter and the 3.5mm 4 pin plug is inserted completely into the AF32
Won't Pair	Make sure the AF32 is in pairing mode as indicated by the red and blue lights flashing in an alternating manner
Won't Connect	Make sure your AF32 is powered on and Bluetooth is enabled on your device. Make sure your device is not connected to any other Bluetooth headset. If connecting still fails, power off your AF32 and turn it back on. If problems persist, delete the device "AF32" and pair the AF32 again.
Won't Control Calls / Media Players	The AF32 headset is compatible with Bluetooth Version 1.1,1.2. 2.0, and 2.1 and supports advanced A2DP operation. Some functions, such as "Rejecting a call", "Redialing" or "Voice dialing" are only available if supported by your mobile phone. Please check the phone manual for further information.
