Let's get started! We'll guide you through startup and tell you a bit about your phone's features.

And when you're ready, customize your phone to match your style with Motorola Shells (sold separately and not available in all countries).

Note: Software updates happen frequently, so your phone may look a little different.

Tips & tricks

- **Start:** Ready to start? See “**Start**”.
- **Top topics:** Just want a quick list of what your phone can do? See “**Top topics**”.
- **Help:** All your questions about your new phone answered right on your phone. Tap Apps (☰) → ? **Help**. Want even more? See “**Get help & more**”.
- **Service Help:** If you need help with your service, contact U.S. Cellular Customer Care at 1-888-944-9400.

Note: Certain apps and features may not be available in all countries.

SAR This product meets the applicable national or international RF exposure guidance (SAR guideline) when used normally against your head or, when worn or carried, at a distance of 1.5 cm from the body. The SAR guideline includes a considerable safety margin designed to assure the safety of all persons, regardless of age and health.

Caution: Before using your phone, please read the safety, regulatory and legal information at www.motorola.com/mymotog.

Remove the back cover

Your phone is water resistant, but it depends on you putting the cover on properly. If you need to remove the cover to insert cards, be sure to replace it properly to ensure water resistance.

Take off the back cover.

Put your finger in the bottom corner hole in the cover and pry it off. Don't be afraid to use a little muscle.

Put on the back cover.

Press all the way around the camera area and the cover's edges for a water-resistant seal.

Caution: Don't use tools to remove the cover—doing so may damage your phone.

Water resistance note: This device is IPX7 water resistant—not waterproof. Avoid prolonged exposure to water. Do not submerge in more than three feet of water or for longer than 30 minutes.

Put in the cards & power on

Note: In some countries, you can use a second SIM card.

Put in the SIM and optional microSD cards.

Caution: Make sure you use the correct size SIM cards, don't cut the SIM card, and don't use adapters with your SIM cards.

Note: The memory card (microSD) won't go in as far as the SIM.

Dual SIM phone settings

With a dual SIM phone, you can use one or two SIM cards. If there's only one SIM in the phone, it's ready to use. With two cards inserted, you can use either or both.

To set up your phone to use two SIM cards, insert both cards, turn on your phone, and follow the prompts. To finish dual SIM setup, drag down the status bar at the top of the home screen and tap **Welcome to your dual SIM**.

Tip: With two SIM cards, you see at the top of your home screen.

Dual SIM with intelligent calling

Your phone learns your usage patterns to choose the best SIM for an outgoing call. Your phone automatically prompts you in the status bar to enable this feature. Or, you can enable it anytime by touching **Apps** → **Settings** → **SIM cards** → **Call settings** → **Phone account settings** → **Make calls with**.

Tip: To make the screen sleep or wake up, press the Power button. To turn your phone on or off, press and hold it.

Battery life

Your phone is like a small computer that processes tons of information and apps at lightning fast speed. Depending on what you use, that can take a lot of power.

To see what's using up battery power, tap **Apps** (☰) → **Settings** → **Battery**.

To turn on Battery saver, tap **Apps** (☰) → **Settings** → **Battery**, then tap **Menu** (☰) → **Battery saver**.

Tips & tricks

To save even more battery life between charges, you could reduce:

- Wi-Fi and Bluetooth® use: Tap **Apps** (☰) → **Settings**, then tap **Wi-Fi** or **Bluetooth** to turn them off when you don't need them.
- GPS use: Tap **Apps** (☰) → **Settings** → **Location** → **Mode** → **Battery saving** to turn off GPS tracking.

- Display brightness: Tap **Apps** (☰) → **Settings** → **Display** → **Brightness level** → (slide dimmer setting left). Make sure **Adaptive brightness** is also turned on.
- Display timeout delay: Tap **Apps** (☰) → **Settings** → **Display** → **Sleep** → (shorter setting).
- Widgets that stream information to your home screen, like news or weather.
- Unused online accounts that you registered: Tap **Apps** (☰) → **Settings** → **Accounts**. Tap the account you want to remove. Tap it again, then tap **Menu** (☰) → **Remove account**.
- Recording or watching videos, listening to music, or taking pictures.

Warning: Don't try to remove or replace the battery yourself—doing so may damage the battery and could cause burning and injury. If your phone becomes unresponsive, try a reboot—press and hold the Power button until the screen goes dark, and your phone restarts.

If you use Gmail™, you already have a Google™ account—if not, you can create an account now. Signing into your Google account lets you use Google apps, see your contacts, appointments, photos, and more.

Just select your language and follow the screen prompts to get started.

Sign in to see your contacts, appointments, and photos.

Tips & tricks

- **Wi-Fi network:** For faster internet access or to conserve data use, swipe the status bar down with two fingers, tap , and then tap **Wi-Fi**. There's more in "**Wi-Fi networks**".
- **Accounts:** To add, edit, or delete accounts, tap Apps  →  **Settings** → **Accounts**, then tap **+ Add account**. To set up email accounts, see "**Email**".
For help with your Google account, visit www.google.com/accounts.
- **Contacts:** To get your contacts from your old phone, you have options. If your old phone was also Android™ and you used the Android Backup and Restore feature, your contacts automatically appear on your new phone. Otherwise, use the Motorola Migrate app in "**Old phone to new phone**". Or, visit www.motorola.com/transfercontacts.

Note: This phone supports apps and services that may use a lot of data, so make sure your data plan meets your needs. Contact your service provider for details.

Old phone to new phone

Copying your personal stuff from your old Bluetooth-enabled phone to your new phone is easy.

Note: If your old phone is an Android™ phone, download the Motorola Migrate app on Google Play™ on your old phone before you get started.

Find it: On your new phone, tap Apps (☰) →  **Migrate**

Select your old phone type.

Tips & tricks

- While you're migrating, you can keep using your phone.
- Signing into your Google account copies your apps if they are backed up to the cloud.
- For iPhones, you can migrate contacts and calendar events only from the iCloud.
- For phones that support copying music, not all music can be copied. (If you want to know more, you can search online to learn about digital rights management or DRM-protected files.)
- Older phones that are not Android or iPhone must have Bluetooth™ capability.

Quick start: Home screen & apps

The home screen is what you see when you first turn on your phone. From here, you can explore apps and more.

- **Search:** Type text in the Google Search box at the top of your home screen, or tap  to search by voice.
- **Open app list:** To see your apps, tap Apps .

Swipe down with one finger for notifications or with two fingers for settings.

Search by typing or say "OK, Google".

Touch and hold an empty spot for widgets, wallpaper, and more.

Tap Apps  to see all your apps.

Tips & tricks

- **Widgets:** To put widgets like a clock, interactive calendar, and more on your home screen, touch and hold an empty spot on the home screen, then tap **WIDGETS**.
- **Pages:** To add a page, drag an app to the right side of the screen until you see a white bar. You can add multiple pages. To show other pages of shortcuts and widgets, swipe the home screen left.
- **Google Now™:** Touch and hold Home , then flick up to the Google icon . After setup, you can access it by swiping right from the home screen.
- **Settings:** To quickly open settings, swipe the status bar down with two fingers and tap .
- **Apps:** To uninstall apps, tap Apps , touch and hold an app, then drag it to **Uninstall**. (You can't uninstall some apps).

To remove an app from a home screen page, touch and hold the app, then drag it to **Remove**. The app isn't removed from your phone, just the home screen.

- **Customization:** For more about changing your home screen, see "**Redecorate your home screen**".

To let your phone install apps that are not on Google Play, tap Apps → **Settings** → **Security** and check **Unknown sources**.

For information about downloading files from your browser, see “**Downloads**”.

Choose carefully

Here are a few tips:

- To help prevent spyware, phishing, or viruses, use apps from trusted sites, like Google Play.
- In Google Play, check the app’s ratings and comments before installing.
- If you doubt the safety of an app, don’t install it.
- Apps use up memory, data, battery, and processing power—some more than others. If you’re not happy with how much memory, data, battery or processing power it’s using, uninstall it.
- Monitor children’s access to apps to help prevent exposure to inappropriate content.
- Certain apps may not provide completely accurate information. Take care, especially when it comes to personal health.

Take care of your apps

Find it: Apps , then swipe left to scroll through apps

To close the apps screen, tap Home or Back .

- **Uninstall apps:** Tap Apps → **Settings** → **Apps**. Swipe left to **ALL**, tap an app, then tap **Disable** or **Uninstall** in the top right (if available).

Disable removes the app from your menu—to **Enable** it, reopen this window and tap **Enable** (disabled apps are at the bottom of the list).

If an app locks up your phone as soon as you turn it on, restart in Safe Mode: Turn off your phone, then turn it back on—when you see the “Motorola” logo during power-up, press and hold both volume buttons until you see the home screen, with **Safe Mode** in the lower left. Then, try removing the app.

- **Reinstall apps:** To reinstall apps from Google Play, tap Apps → **Play Store**, then tap → **My apps**. The apps you downloaded are listed and available for download.
- **See or clear app details:** Tap Apps → **Settings** → **Apps**. Swipe left or right to see the list of **DOWNLOADED**, **RUNNING**, or **ALL** apps, then tap an app in the list to see its details and storage usage. You can tap **Clear data**, **Clear cache**, or other options.

Tip: To quickly show app details, tap Apps , touch and hold an app, then drag it to **App info**.
- **See app data usage:** To see which apps are using the most data, tap Apps → **Settings** → **Data usage**. For more, see “**Data use**”.

Update your phone

Use your phone or computer to check, download, and install phone software updates:

- Using your phone:

If your phone notifies you about an update, follow the instructions to download and install it.

To manually check for updates, tap Apps  →  **Settings** → **About phone** → **System updates**.

Your phone downloads updates over your Wi-Fi connection (if available) or mobile network. We recommend that you download updates over a Wi-Fi connection. Remember, these updates can be quite large (25MB or more) and may not be available in all countries. If the mobile network updates are not available in your country, update using a computer.

- Using your computer:

On your computer, go to www.motorola.com/update.

app from the list, swipe it left or right. To scroll the list, swipe up or down.

Tip: You don't need to remove apps from Overview for your phone to run efficiently.

- **Menus:** When  or  appears on a screen, you can tap it to open options for the current screen.
- **Close keyboard:** To close a touchscreen keyboard, tap .
- **Reboot:** To reboot your phone, press and hold the Power button until the screen goes dark and your phone restarts.

Press

Power button

Your power button helps in a few ways:

- **Power off:** Press and hold the Power button to choose **Power off**.
- **Sleep:** To conserve battery power, prevent accidental touches, or when you want to wipe smudges off your touchscreen, put the touchscreen to sleep by pressing the Power button.
- **Wake up:** Press the Power button again.

Tip: To add security to your phone, see “**Protect**”.

Volume buttons

Your volume buttons help in a few ways:

- **Ringer volume:** Press the buttons when your phone is ringing to silence it.
- **Earpiece volume:** Press the buttons during a call.
- **Music/video volume:** Press the buttons during a song or video.

Tip: For more on volume control, see “**Volume**”.

Speak

Just tell your phone what you want.

Tip: Speak naturally but clearly, like using a speakerphone.

- **Search:** Tap  on the home screen to search by voice, or say, “OK Google” to speak your search.

To change your voice input and text-to-speech settings, tap Apps  →  **Settings** → **Language & input**.

- **Dialing and commands:** Tap . To dial, say “Call” and then a contact name or phone number. Or, say a command like “Send text,” “Go to” an app, or “Help” for voice command help.

Tip: If a contact has more than one number, you can say which number to call. For example, “Call Joe Black Mobile” or “Call Suzi Smith Work.”

Quick settings

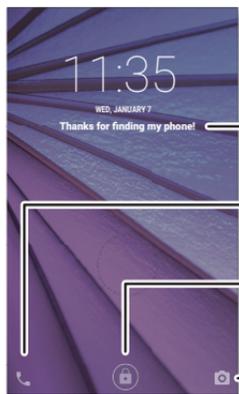

Accessibility

To pause/resume TalkBack, wave your hand over the screen. To activate this feature, tap Apps  →  **Settings** → **Accessibility** → **TalkBack** → **SETTINGS** → **Use proximity sensor**.

Tip: If Explore by touch is on, swipe down then right to open the global context menu, then use the menu to pause TalkBack.

To turn off TalkBack, tap Apps  →  **Settings** → **Accessibility** → **TalkBack**, then tap the switch to turn it off.

Explore by touch

Use Explore by touch to expand TalkBack, and have your touches read out loud as you move your finger around the screen.

To turn on Explore by touch when TalkBack is active, tap Apps  →  **Settings** → **Accessibility** → **TalkBack** → **SETTINGS** → **Explore by touch**.

Tip: When you turn on TalkBack for the first time, your phone asks if you want to **Enable Explore by touch?** Tap **OK** to turn it on.

Explore by touch changes your phone's touch gestures so the location of your touches can be read out loud.

- **Tap** something on the screen to hear a description or text readout.
- **Double-tap** anywhere on the screen to open or activate the last touched item.
- **Swipe** using two fingers to scroll through lists or between screens.

Shortcut gestures let you navigate your phone with simple swipe gestures (for example, swipe up then left in a single motion to go to the home screen). To see or change these shortcuts, tap Apps  →  **Settings** → **Accessibility** → **TalkBack** → **SETTINGS** → **Manage gestures**.

Note: The way these gestures are interpreted is specific to TalkBack. Other accessibility services may use the same gestures for different actions.

To learn more about navigating your phone with Explore by touch, tap Apps  →  **Settings** → **Accessibility** → **TalkBack** → **SETTINGS** → **Launch "Explore by touch" tutorial**.

To turn off Explore by touch when TalkBack is active, tap Apps  →  **Settings** → **Accessibility** → **TalkBack** → **SETTINGS**, and uncheck **Explore by touch**.

Braille

Combine your Braille display with TalkBack for braille and speech feedback.

- 1 Download the BrailleBack app from Google Play (tap Apps  →  **Play Store**), and install it on your phone.
- 2 Tap Apps  →  **Settings** → **Accessibility** → **BrailleBack**.
- 3 Turn on your Braille display and put it in Bluetooth® pairing mode.
- 4 On your phone, tap Apps  →  **Settings** → **Bluetooth**, then tap the Bluetooth switch to turn it on and scan.
- 5 Tap the name of your Braille display to pair it with the phone.

Accessibility shortcut

Use simple gestures to quickly activate TalkBack and other accessibility features on your phone. For more information, tap Apps  →  **Settings** → **Accessibility** → **Accessibility shortcut**.

Caller ID

When you want to hear who's calling:

- **Read out loud:** Have your caller announced—tap Apps  →  **Settings** → **Accessibility** → **TalkBack** → **SETTINGS** → **Speak Caller ID**.
- **Ringtone:** Assign a unique ringtone to a contact. Tap Apps  →  **Contacts**, and tap the contact. Tap , then tap Menu  → **Set ringtone**.

Volume & vibrate

Find it: Apps  →  **Settings** → **Sound & notification** →

Volumes or Vibrate when ringing

- **Volumes** opens sliders that let you set different volumes for your music or videos, ringtone, text or email notifications, and alarms.
- **Vibrate when ringing** determines whether your phone vibrates for incoming calls (even if the ringer is silent).

Tip: For more on volume control, see “**Volume**”.

Zoom

Get a closer look.

- **Pinch to zoom:** Pinch to zoom on maps, web pages, and photos—to zoom in, tap the screen with two fingers and

then drag them apart. To zoom out, drag your fingers together.

Tip: To zoom in, you can also double-tap.

- **Screen magnification:** Triple tap the screen for full screen magnification, or triple tap and hold to temporarily magnify. Tap Apps  →  **Settings** → **Accessibility** → **Magnification gestures**.
- **Big text:** Show bigger text throughout your phone. Tap Apps  →  **Settings** → **Accessibility** → **Large text**.
Tip: Or tap Apps  →  **Settings** → **Display** → **Font size** → **Huge**.
- **High contrast text:** Show higher contrast text throughout your phone. Tap Apps  →  **Settings** → **Accessibility** → **High contrast text**.
- **Browser:** Choose text scaling and other accessibility settings for your browser. Tap Apps  →  **Chrome** → Menu  → **Settings** → **Accessibility**.
Tip: Use **Force enable zoom** to allow zooming on all webpages.

Display brightness

Your phone automatically adjusts the screen brightness when you're in bright or dark places. But you can set your own brightness level instead:

Swipe down the status bar with two fingers, and slide the bar to adjust.

Note: Setting brightness to a high level decreases your phone's battery life.

Touchscreen & keys

To hear or feel when you tap the screen, tap Apps (☰)

→ **Settings** → **Sound & notification** → **Other sounds**:

- **Touchscreen:** To hear a click when you tap something on the screen, select **Touch sounds**.
- **Keys:** To feel a vibration when you tap the keyboard, select **Vibrate on touch**.
- **Screen lock:** To hear a click when you lock or unlock the screen, select **Screen lock sounds**.

Messages

To make text entry even easier, use features like auto-capitalization, auto-correction, and more. Tap Apps (☰) → **Settings** → **Language & input**, then tap a keyboard type. Of course, if you don't want to type at all, use your voice. Tap  on the touchscreen keyboard.

Hearing aids

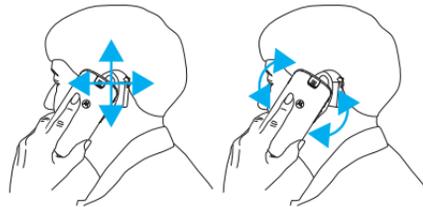

To help get a clear sound when using a hearing aid or cochlear implant, your phone may have been rated for use with hearing aids. If your phone's box has "Rated for Hearing Aids" printed on it, then please read the following guidance.

Note: Ratings are not a guarantee of compatibility (visit www.motorola.com/hacphones). You may also want to consult your hearing health professional, who should be able to help you get the best results.

• **Settings:** Tap  **Phone** → Menu (☰) → **Settings** → **Calls** → **Hearing aids**.

• **Call volume:** During a call, press the side volume buttons to set a call volume that works for you.

• **Position:** During a call, hold the phone to your ear as normal, and then rotate/move it to get the best position for speaking and listening.

TTY

You can use your phone in TTY mode with standard teletype machines. Tap  **Phone** → Menu (☰) → **Settings** → **Calls** → **TTY mode** and select the mode you need:

- **TTY Full:** Type and read text on your TTY device.
- **TTY HCO:** Hearing-Carry-Over—type text on your TTY device and listen to voice replies on your phone's speaker.
- **TTY VCO:** Voice-Carry-Over—speak into your phone and read text replies on your TTY device.

Note: You'll need a cable/adaptor to connect your TTY device to the headset jack on your phone.

Quick start: Calls

Dial contacts, recent calls, or numbers, all from one app.

Find it:  **Phone**

- To call a contact or recent call, tap it.
- To open the dialpad, tap . Enter a number, then tap  to call it.

Search your contacts.

Tap to call the last caller.

See all of your contacts.

Open dialpad to dial a number.

During a call:

 Speaker

 Mute

 Dialpad

 Hold

 Add caller

Tips & tricks

- **During a call:** Your touchscreen goes dark to avoid accidental touches. To wake it up, move it away from your face or press the Power button.
- **Multi-task:** While you're on a call, tap Home  to hide the call screen and look up a phone number, address, or open other apps. To reopen the call screen, swipe down the status bar and tap **Ongoing call**.
- **Contacts:** To search your contacts, tap **CONTACTS**.
- **Favorite contact:** Have someone you call all the time? Touch and hold an empty spot on your home screen, tap **WIDGETS**, then touch and hold the **Direct dial** widget. Drag it to your home screen, then select the contact. Tap the widget to dial the person.
- **Voicemail:**  appears in the status bar when you have new voicemail. To hear it, tap  **Phone** → , then touch and hold **1**.

Make calls

When you make a call, you have options:

- Tap  **Phone**, to see your recent calls, favorites, and frequently-called contacts. Select a contact or number to call it.
- To dial a number, tap , enter a number, then tap  to call it.
- To enter the international dialing code (+), touch and hold **0**. To add a pause or wait after numbers, tap Menu .

Answer & end calls

- **Answer a call:** When your phone is unlocked, tap  **ANSWER**.

Note: When your phone is locked, swipe right to answer a call.

With call waiting on, tap  and drag to  to answer the new call, then tap **Hold current call + Answer** or **End current call + Answer**.

- **Ignore a call:** When your phone is unlocked, tap  **DISMISS**. If locked, swipe left to send the call to voicemail. You can also press the Power button to ignore the call or press a volume button to silence the ringer.
- **Respond with a text:** To send a pre-set message to an incoming caller, tap the caller's name (if visible). Tap  and drag to .
- **End a call:** Tap .
- **During a call:** Tap  **Mute** to mute the call. To hide the call screen, tap Home . To reopen it, swipe down the status bar and tap **Ongoing call**.

Note: When you hold your phone to your ear, the touchscreen goes dark to avoid accidental touches. When you move your phone away from your ear, the screen lights up again.

Don't use covers or screen protectors (even clear ones) that cover the proximity sensor.

Recent calls

View your calls (with newest first), and then call, text, or store them:

Find it:  **Phone** → **RECENTS**

- To call a number, tap a contact name, then tap **CALL BACK**.
- To send a text message, store the number, or other options, tap the contact picture.
- To remove an entry from the call log, tap it, then tap **DETAILS** → .
- To clear the list, tap Menu  → **Call History**, then tap Menu  → **Clear call log**.

3-way calls

During a call, you can start another call, switch between them, or join them in a 3-way call:

- To answer a second call, tap  and drag to . To ignore it, tap  and drag to .
- To dial a second call, tap  , enter a number, then tap  to call it.

The first call goes on hold if you answer the second call. To switch between calls, tap .

The first call goes on hold when you tap  . To join the calls after the second call answers, tap .

Tap a contact to see more options. Depending on the information you have for that person, you can call, text, or send email. You can also use voice recognition (see “**Speak**”).

Favorites

Set your most-used contacts as favorites, so you can get to them faster.

- To set a favorite, tap Apps → **Contacts**, select a contact and tap .
- To see your favorites, tap Apps → **Contacts** → **FAVORITES**.

Edit, delete, or hide contacts

Find it: Apps → **Contacts**

- To edit a contact, tap it, then tap . Tap a field to edit it. Tap to choose the contact's picture.
- To set a personal ringtone for the contact, tap it, tap then tap Menu → **Set ringtone**.
- To delete the contact, tap it, tap , then tap Menu → **Delete**.

Contacts from social networks will be hidden if you select **Delete**. To view these contacts, or delete them permanently, use the social network's app or website.

- To hide the contacts from an account in your **Contacts** list, tap Menu → **Contacts to display**. Tap an account type to show it. Tap **Customize** to uncheck accounts you always want to hide.

Get contacts

Get all your contacts in one place.

- To add your social networking contacts, tap Apps → **Settings** → **Accounts**, then tap **Add account**.

Note: You'll need a social networking app first. See “**Google Play™**” to get apps.

- To add your email contacts, see “**Email**”.

Tip: If you add a **Corporate Sync** account, you can send messages to your coworkers, even if you don't have them stored in your contacts.

- To import contacts from your SIM card (if it didn't happen automatically): Tap Apps → **Contacts** → Menu → **Import/export** → **Import from SIM card**. Tap **OK** to confirm.
- To import contacts from your computer, upload the contacts to your Google™ account at <http://contacts.google.com>. On your phone, tap Apps → **Contacts** → Menu → **Accounts** → Menu → **Auto-sync data**. You can also see these contacts at <http://mail.google.com>.

For help with transferring contacts, see “**Old phone to new phone**”.

- **Chat from a computer:** You can chat from a computer, too. Find out more at www.google.com/hangouts.

Wireless Emergency Alerts (U.S. & some countries only)

Wireless Emergency Alerts, also known as CMAS or PLAN, is a U.S. national emergency alert system. Emergency alerts can pop up to tell you about a national or local crisis. After you close an alert, you can reopen it by touching Apps → **Settings** → **More** → **Emergency broadcasts**.

Tip: Emergency alerts have a special sound and vibration that is two seconds long, followed by one second, then another one second.

To choose which types of alerts you receive, tap Apps → **Settings** → **More** → **Emergency broadcasts**. The U.S. and local governments send these alerts through your service provider. So you will always receive alerts for the area where you are, and you won't receive alerts if you're outside of the U.S.

For more, visit www.ctia.org/consumer_info/safety/.

Type

keyboard when you need it

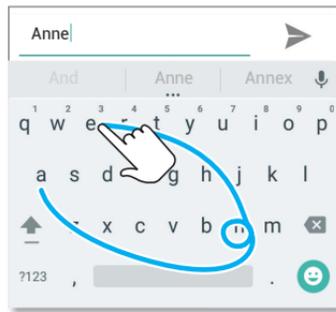

Type

Quick start: Type
Text entry settings & dictionary
Cut, copy & paste

Quick start: Type

When you tap a text box, like in a message or search, you have keyboard options.

- **Type or gesture:** Enter letters by touching them one at a time. Or, enter a word by tracing a path through the letters.
- **Close the keyboard:** Tap ▾.

See a different keyboard? It varies by app. This one is for texting.

Tips & tricks

- **Move the cursor:** Tap a spot in the text to place the cursor, then drag the arrow under the cursor to move it.
- **Dictionary:** To add a word you enter often, enter it, tap the word in the word list below the text box, then tap there again to add it to your dictionary.
- **Symbols:** Touch and hold a letter to enter the small number or symbol at the top of it.
To enter several numbers or symbols, tap .
- **Double letters:** Circle a letter to enter two of them.
- **Capital letters:** Tap  or drag it to the letter you want to capitalize.
- **Special characters:** Touch and hold a letter to choose from other special characters.
- **Word prediction:** While you're typing, word suggestions appear above the keyboard. Tap one to select it.
- **Voice entry:** Tap  on the touchscreen keyboard, then say what you want to type. You can speak as long as you like, pause whenever you want, and dictate punctuation.
- **Vibrate:** Don't like the vibrating keys when you type? Tap Apps  →  **Settings** → **Language & input** → **Google Keyboard** → **Preferences**.

Quick start: Photos & videos

Use the 13 megapixel camera to take crisp, clear photos with two twists of your wrist and a tap on the screen.

- **Launch it:** Even when your phone is asleep, open your camera with two twists of your wrist.
- **See it:** Swipe left for your photo gallery ( Gallery).
- **Share it:** View a photo or video from your gallery, then tap Share .

Tap anywhere to take the photo. Touch and hold for multiple shots.

Swipe right for effects and settings.

Switch to front camera.

Switch to video camera.

Tips & tricks

- **Quick Capture:** Tap Apps  →  **Camera**, swipe the screen right and tap  to turn Quick Capture on or off. When Quick Capture is on, twist your wrist twice to open the camera.
- **Take a selfie:** Tap  in the camera screen or twist your wrist to switch to the front camera.
- **Record a video:** Tap  in the camera screen to temporarily switch to the video camera and start recording. Then tap  to stop recording.
- **Capture a still shot during a video:** Tap anywhere on the screen while recording to save a photo.
- **View, share, or delete:** To open your gallery, swipe the camera screen left. Pick a photo or video. Choose  to share,  to delete, or Menu  for more options.
- **Change settings:** To open camera options, swipe the camera screen right. Rotate the dial to see more options.
- **Zoom:** Drag the camera screen up or down using one finger.
- **Multi-shot:** When you're ready, touch and hold the camera screen to take a burst of photos.
- **Panorama:** To take a panoramic shot, swipe the camera screen right to open settings, then tap . Use the on-screen guide to slowly pan your phone.
- **Crop:** To edit a photo, tap the photo to select it, then tap .
- **Print:** Want to print your photos? Check out **"Print"**.

Bluetooth® wireless

Turn Bluetooth power on/off

Find it: Apps  →  **Settings** → **Bluetooth**, then tap the switch to turn it on

Note: Swipe down the status bar with two fingers to quickly turn Bluetooth on or off.

Tip: To extend battery life or stop connections, turn Bluetooth off when you're not using it.

Connect devices

The **first time** you connect a Bluetooth device, follow these steps:

- 1 Make sure the device you are pairing with is in discoverable mode (for details, refer to the guide that came with the device).
- 2 Tap Apps  →  **Settings** → **Bluetooth**.
- 3 Make sure the switch is on.
- 4 Tap a found device to connect it (if necessary, tap **Pair** or enter a passkey like **0000**).

Tip: Tap  to rename a device.

When the device connects, the Bluetooth status indicator shows at the top of the screen .

To automatically **disconnect** or **reconnect** a device anytime, like a wireless headset, just turn the device off or on.

Note: Using a mobile device or accessory while driving may cause distraction and may be illegal. Always obey the laws and drive safely.

Manage devices

To manually reconnect your phone with a paired device, tap the device name in the list.

To manually disconnect your phone from a paired device, tap the device name in the devices list, then tap **OK**.

To remove a paired device, tap  next to the device name, then tap **Unpair**.

To change the name your phone shows to other devices, tap Apps  →  **Settings** → **Bluetooth**, turn Bluetooth power on, then tap Menu  → **Rename phone**. Enter a name and tap **Rename**.

Let devices find your phone

To let a Bluetooth device discover your phone, just turn the Bluetooth switch on.

Transfer files

- **Photos or videos:** Open the photo or video, then tap  → **Bluetooth**.
- **Contacts:** Tap Apps  →  **Contacts**, tap a person, then tap Menu  → **Share** → **Bluetooth**.

Wi-Fi networks

Turn Wi-Fi power on/off

Find it: Apps  →  **Settings** → **Wi-Fi**, then tap the switch to turn it on

Connect to networks

To find networks in your range:

- 1 Tap Apps  →  **Settings** → **Wi-Fi**.

Tip: To show your phone's MAC address and Wi-Fi settings, tap Menu  → **Advanced**.

- 2 Make sure the Wi-Fi switch is turned on.

- 3 Tap a found network to connect it (if necessary, enter **Network SSID**, **Security**, and **Wireless password**, and tap **Connect**).

When your phone connects, the Wi-Fi status indicator  appears in the status bar.

Note: If you see a question mark in the Wi-Fi status indicator , swipe the status bar down, tap the network, and enter the network's password.

Tip: When Wi-Fi is on, your phone automatically reconnects to available networks it has used before. If a router previously had no internet connection, your phone will not automatically connect to it.

Wi-Fi hotspot

Note: This phone supports apps and services that may use a lot of data, so make sure your data plan meets your needs. Contact your service provider for details.

You can make your phone a Wi-Fi hotspot to provide portable, convenient internet access to other Wi-Fi enabled devices.

Note: Keep it secure. To protect your phone and hotspot from unauthorized access, it is strongly recommended that you set up hotspot security (WPA2 is the most secure), including password.

Find it: Apps  →  **Settings** → **More** → **Tethering & portable hotspot** and check **Portable Wi-Fi hotspot**

Note: These steps may vary depending on your network.

- 1 Your phone turns off Wi-Fi and uses the mobile network for internet access. Tap **Set up Wi-Fi hotspot** to set up security:

- **Network SSID:** Enter a unique name for your hotspot.
- **Security:** Select the type of security you want: **Open** or **WPA2**. For **WPA2**, enter a unique password that others will need to access your Wi-Fi hotspot.

Note: **WPA2** is recommended by IEEE.

- **Password:** Create a password with at least eight characters.

- 2 Tap **SAVE**.

When your Wi-Fi hotspot is active, other Wi-Fi enabled devices can connect by entering your hotspot's **SSID**, selecting a **Security** type, and entering the correct **Wireless password**.

Wi-Fi modes

For those who like to get a bit more technical, your phone supports the following Wi-Fi modes: 802.11b, g, n.

USB cables

Note: Copyright—do you have the right? Always follow the rules. See “**Content Copyright**” in your Legal Guide.

To load music, pictures, videos, documents, or other files from your computer, connect your phone to your computer with a USB cable. To change the type of USB connection (if necessary), tap Apps → **Settings** → **Storage** → Menu → **USB computer connection**.

Tip: Make sure to connect the phone to a high power USB port. Typically, these are located directly on your computer.

Note: The first time you use a USB connection, your computer may indicate that drivers are being installed. Follow any prompts you see to complete the installation. This may take a few minutes.

- For Microsoft® Windows®: On your computer, choose Start, then select Windows Explorer from your list of programs. In Windows Explorer, your phone will appear as a connected drive (mass storage device) where you can drag and drop files, or it will appear as an MTP or PTP device that lets you use Windows Media Player to transfer files. For more instructions or driver files, visit www.motorola.com/support.
- For Apple™ Macintosh™: Use Android File Transfer, available at www.android.com/filetransfer.

Share your data connection

Your computer can access the internet through your phone's mobile network—you just need a USB cable.

Tip: To share a Wi-Fi connection, see “**Wi-Fi hotspot**”.

- 1 Connect your phone to your computer using a USB cable.
Note: If your computer is running something older than Microsoft® Windows® 7 or Apple™ Macintosh™ OS X, it might require special configuration.
- 2 On your phone, tap Apps → **Settings**, then make sure the **Wi-Fi** switch is set to off.
- 3 In **Settings**, tap **More** → **Tethering & portable hotspot**, then check **USB tethering** to start the connection.
To stop the connection, uncheck **USB tethering**, then disconnect your phone from your computer.

Data use

You can track the amount of data your phone uploads and downloads.

Find it: Apps → **Settings** → **Data usage**

Airplane mode

Your phone shows a data usage graph. Below the graph, apps appear from highest to least data usage. Apps that use a lot of data might also use a lot of battery power.

Restrict background data, show wi-fi networks, and more.

Tap to set a data limit, so you don't use too much.

Tap a user or app to see specific data usage.

Some apps transfer data in the background when you're not viewing them—to stop an app from doing this, tap it and then check **Restrict app background data**.

To turn off background data use for all apps, just tap Menu ⋮ → **Restrict background data**.

Note: Usage information is provided to help you manage your phone. This may not match the amounts charged by your service provider, as they're not measured in the same way.

Your cloud

One account with access to everything, everywhere—phone, tablet, computer.

Sync your Google account

When you log in to the same Google account, all devices can get to all the same apps, movies, books, and music from Google Play—plus you share the same Gmail, Google Calendar™, and Google Mobile™. To add accounts to your phone, tap Apps ⋮ → **Settings** → **Accounts**, then tap **+ Add account** → **Google**.

Phone & tablet

Your Android phone and tablet can work together to help you get the most out of both:

- **Transfer media and files:** Copy files to your phone and transfer them to other devices—see **“Transfer files”**.
- **Phone hotspot:** If you have a Wi-Fi tablet, turn your phone into a Wi-Fi hotspot to let your tablet access the internet anywhere—see **“Wi-Fi hotspot”**.
- **Bluetooth® accessories:** If you have a Bluetooth keyboard or other accessories to use with your tablet, remember you can use them with your phone too. To connect them, see **“Bluetooth® wireless”**.

Memory card

Your photos, videos, and other files are automatically stored in your phone's internal memory. You can set certain apps, like the camera, to store files on a microSD card.

Note: Your phone supports memory cards up to 32 GB.

Find it: Apps  →  **Settings** → **Storage** → **SD CARD**

Mount or unmount memory card

To mount a memory card, simply put it into your phone.

To unmount your memory card (so you can take it out of your phone), tap Apps  →  **Settings** → **Storage** → **Unmount SD card**.

Caution: Do not remove a memory card while your phone is using it or writing files to it.

Erase memory card content

To delete all the information (music, photos, and files) from your memory card, tap Apps  →  **Settings** → **Storage** → **Erase SD card**.

Virtual Private Networks (VPN)

A VPN lets you access files on a secured network (like an office network with a firewall). Contact the network administrator to ask for VPN settings, and any additional apps or other requirements.

To enter VPN settings, tap Apps  →  **Settings** → **More** → **VPN**. Tap **+** to add a new VPN. Choose the type of VPN and enter settings from the network administrator. The network is

stored in the **VPN** list so you can select it whenever you need to connect.

Mobile network

You should not need to change any network settings. Contact your service provider for help.

To see network settings options, tap Apps  →  **Settings** → **More** → **Cellular networks**.

Airplane mode

Use airplane mode to turn off all your wireless connections—useful when flying. Swipe down the status bar with two fingers, then tap **Airplane mode**.

Note: When you select airplane mode, all wireless services are disabled. You can then turn Wi-Fi and/or Bluetooth® power back on, if permitted by your airline. Other wireless voice and data services (such as calls and text messages) remain off in airplane mode. Emergency calls to your region's emergency number can still be made.

Quick start: Protect your phone

Make sure your information is protected in case your phone is lost or stolen.

Find it: Apps → **Settings** → **Security**

The easiest way to protect your phone is to use **Screen lock**. You can choose to swipe to unlock, or enter a pattern, PIN, or passcode to unlock your phone.

Screen lock

To keep your phone secure, you can make the touchscreen lock when it goes to sleep.

For a screen lock, you can use a pattern, password, or other option.

Add some info to show on your lock screen.

Encrypt the data stored on your smartphone.

Find it: Apps → **Settings** → **Security** → **Screen lock**, then select the lock type:

- **None:** Turn off the screen lock.
- **Swipe:** Tap and drag up.
- **Pattern:** Draw a pattern to unlock.
- **PIN:** Enter four to sixteen digits to unlock.
- **Password:** enter four to sixteen letters, digits, or symbols to unlock.

To change when your touchscreen goes to sleep, tap Apps → **Settings** → **Display** → **Sleep**.

Note: You can make emergency calls on a locked phone (see “**Emergency calls**”). A locked phone still rings, and you do not need to enter a PIN or password to answer a call.

Can't unlock?

Pattern, PIN, or password: If you forget your pattern, PIN, or password, you can enter your Google™ account email and password to unlock the phone.

If you don't have a Google account on your phone, contact your service provider to have your device factory reset.

Warning: A factory reset will delete all data on your phone.

Screen pinning

Need to keep an important screen handy, such as a boarding pass or shopping coupon? Pin the screen for easy access.

To set up screen pinning, tap Apps → **Settings** → **Security** → **Screen pinning**.

Protect

Protect

Quick start: Protect your phone

Screen lock

Screen pinning

SIM card lock

Encrypt your phone

Backup & restore

Reset

Stolen phone?

Menu

More

Back

Next

To pin a screen, open the app you want to pin, tap Overview , and scroll up. Tap .

To unpin the screen, tap Back  and Overview  at the same time.

SIM card lock

Caution: If you enter an incorrect SIM PIN code three times, your phone locks your SIM card and asks for your PIN unlock code. Contact your service provider for your PIN unlock code.

You shouldn't need to use this feature, but to set a SIM card PIN that you must enter when you turn on your phone, tap Apps  →  **Settings** → **Security** → **Set up SIM card lock** → **Lock SIM card**.

To set your SIM PIN, enter a 4-digit code. To change your code, choose **Change SIM PIN**.

Encrypt your phone

Caution: If you forget your encryption code, you cannot recover the data stored on your phone or memory card. Encrypting your files can take an hour or more. Leave your phone plugged in, and be careful not to interrupt the process.

Encryption protects the accounts, settings, apps, and files on your phone, so that people cannot access them if your phone is stolen.

You shouldn't need to use this feature, but to encrypt your phone and require a PIN or password whenever you turn on your phone, tap Apps  →  **Settings** → **Security** → **Encrypt phone**.

Backup & restore

Find it: Apps  →  **Settings** → **Backup & reset**, then tap the switch to turn it on

Your Google account data is backed up online. If you reset or replace your phone, just log in to your Google account to restore the contacts, events, and other details you synced with the account.

To choose what syncs with the account, tap Apps  →  **Settings** → **Accounts** → **Google**, tap your Google account, and check things to sync.

Note: Text messages, call logs, and items stored on your phone will not be restored. To restore your Google Play Store apps, see “**Take care of your apps**”.

Reset

To reset your phone to factory settings and erase all the data on your phone, tap Apps  →  **Settings** → **Backup & reset** → **Factory data reset** → **RESET PHONE**.

Warning: All downloaded apps and user data on your phone will be deleted. Data in the cloud will not be deleted.

Stolen phone?

Your phone has Android Device Manager. You can remote lock or reset your device to protect your device from thieves. For details, see www.google.com/android/devicemanager.
