THANK YOU FOR CHOOSING POLSEN.

The Polsen HDR-10 is a handheld omnidirectional dynamic microphone that uniformly captures sound on- or off-axis. This makes it ideal for audio and video applications like ENG and interviews, because it can pick up sound in a 360° pattern. The frequency response is tailored for speech, resulting in a natural sound with clear dialogue intelligibility. The capsule is isolated in rubber to reduce handling noise, and the integrated metal mesh windscreen and included foam windscreen lower wind noise and plosive sounds. The body of the microphone is constructed from cast aluminum alloy to provide durability and a professional appearance.
