

Digital Wireless Package

The supplied CD-ROM includes the Operating Instructions (English, French, German, Italian, and Spanish versions) in PDF format.
For more details, see "Using the CD-ROM manual" on page 16.

Operating Instructions

Before operating the unit, please read this manual thoroughly and retain it for future reference.

DWZ-M50
DWZ-B30GB

For the ZTX-M01/B01 Transmitters

Owner's Record

The model and serial numbers are located at the rear or on the bottom of the unit. Record the model and serial numbers in the space provided below.

Refer to these numbers whenever you call upon your Sony dealer regarding this product.

Model No. _____

Serial No. _____

WARNING

Batteries shall not be exposed to excessive heat such as sunshine, fire or the like.

If the transmitter develops an abnormally high temperature, a burning odor or smoke during use, remove the battery holder and stop using the transmitter immediately. Take care not to burn your fingers when removing the battery holder as the batteries may be very hot at this time.

AVERTISSEMENT

N'exposez pas les batteries à une chaleur excessive, au soleil ou près d'un feu par exemple.

Si l'émetteur dégage une température anormalement élevée, une odeur de brûlé ou de la fumée pendant son utilisation, enlevez le support de piles et arrêtez toute utilisation immédiatement.

Attention à ne pas vous brûler les doigts lorsque vous retirez le support de piles car celles-ci peuvent être brûlantes.

WARNUNG

Akkus dürfen keinesfalls übermäßiger Wärmeeinwirkung ausgesetzt werden, wie z.B. Sonneneinstrahlung, Feuer o. ä.

Wenn der Sender eine abnormale hohe Temperatur, einen Geruch nach Verbranatem oder Rauch entwickelt,

entnehmen Sie den Batterie-Halter und stoppen Sie sofort den Betrieb des Senders. Achten Sie bei der Entnahme des Batterie-Halters darauf, sich nicht die Finger zu verbrennen, denn die Batterien könnten sehr heiß zu diesem Zeitpunkt sein.

For the customers in the U.S.A.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

All interface cables used to connect peripherals must be shielded in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules.

If you have any questions about this product, you may call ;

Declaration of Conformity

Trade Name : SONY

Model : ZTX-M01/B01

Responsible party : Sony Electronics Inc.

Address : 16530 Via Esprillo,
San Diego, CA 92127 U.S.A.

Telephone Number : 858-942-2230

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE: To comply with the FCC RF exposure compliance requirements, no change to the antenna or the device is permitted.

Any change to the antenna or the device could result in the device exceeding the RF exposure requirements and void user's authority to operate this device.

This device complies with FCC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65. This device has very low levels of RF energy that it is deemed to comply without testing of specific absorption ratio (SAR).

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

For the customers in Canada

This Class B digital apparatus complies with Canadian ICES-003.

This device complies with Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

The term "IC:" before the radio certification number only signifies that Industry Canada technical specifications were met.

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment and meets RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment has very low levels of RF energy that are deemed to comply without testing of specific absorption ratio (SAR).

Pour les clients au Canada

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

La mention « IC: » devant le numéro de certification/homologation signifie uniquement que les spécifications techniques d'Industrie Canada sont remplies.

Cet équipement est conforme aux limites d'exposition aux rayonnements énoncées pour un environnement non contrôlé et respecte les règles d'exposition aux fréquences radioélectriques (RF) CNR-102 de l'IC. Cet équipement émet une énergie RF très faible qui est considérée conforme sans évaluation du débit d'absorption spécifique (DAS).

For the customers in Europe

Hereby, Sony Corporation, declares that this ZTX-M01/B01 is in compliance with the essential requirements and other relevant provisions of the Directive 1999/5/EC.

For the ZRX-HR50/C30 Receivers

Owner's Record

The model and serial numbers are located at the rear or on the bottom of the unit. Record the model and serial numbers in the space provided below.

Refer to these numbers whenever you call upon your Sony dealer regarding this product.

Model No. _____

Serial No. _____

IMPORTANT

The nameplate is located on the bottom.

IMPORTANT

La plaque signalétique se situe sous l'appareil.

WICHTIG

Das Namensschild befindet sich auf der Unterseite des Gerätes.

WARNING

Excessive sound pressure from earphones and headphones can cause hearing loss. In order to use this product safely, avoid prolonged listening at excessive sound pressure levels.

Batteries shall not be exposed to excessive heat such as sunshine, fire or the like.

If the receiver develops an abnormally high temperature, a burning odor or smoke during use, remove the battery holder and stop using the receiver immediately.

Take care not to burn your fingers when removing the battery holder as the batteries may be very hot at this time.

AVERTISSEMENT

Une pression acoustique excessive en provenance des écouteurs ou du casque peut provoquer une baisse de l'acuité auditive. Pour utiliser ce produit en toute sécurité, évitez l'écoute prolongée à des pressions sonores excessives.

N'exposez pas les batteries à une chaleur excessive, au soleil ou près d'un feu par exemple.

Si le récepteur dégage une température anormalement élevée, une odeur de brûlé ou de la fumée pendant son utilisation, enlevez le support de piles et arrêtez toute utilisation immédiatement.

Attention à ne pas vous brûler les doigts lorsque vous retirez le support de piles car celles-ci peuvent être brûlantes.

WARNUNG

Zu hoher Schalldruck von Ohrhörern und Kopfhörern kann Gehörschäden verursachen.

Um dieses Produkt sicher zu verwenden, vermeiden Sie längeres Hören bei sehr hohen Schalldruckpegeln.

Akkus dürfen keinesfalls übermäßiger Wärmeeinwirkung ausgesetzt werden, wie z.B. Sonneneinstrahlung, Feuer o. ä.

Wenn der Empfänger eine abnormale hohe Temperatur, einen Geruch nach Verbranntem oder Rauch entwickelt, entnehmen Sie den Batterie-Halter und stoppen Sie sofort den Betrieb des Empfängers.

Achten Sie bei der Entnahme des Batterie-Halters darauf, sich nicht die Finger zu verbrennen, denn die Batterien könnten sehr heiß zu diesem Zeitpunkt sein.

About the supplied AC adapter

A propos de l'adaptateur CA fourni

Informationen zum mitgelieferten Netzteil

Important Safety Instructions

- Read these instructions.
- Keep these instructions.
- Heed all warnings.
- Follow all instructions.
- Do not use this apparatus near water.
- Clean only with dry cloth.
- Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- Only use attachments/accessories specified by the manufacturer.
- Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

- Unplug this apparatus during lightning storms or when unused for long periods of time.
- Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

WARNING

To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.

To avoid electrical shock, do not open the cabinet. Refer servicing to qualified personnel only.

When installing the unit, incorporate a readily accessible disconnect device in the fixed wiring, or connect the power plug to an easily accessible socket-outlet near the unit. If a fault should occur during operation of the unit, operate the disconnect device to switch the power supply off, or disconnect the power plug.

AVERTISSEMENT

Afin de réduire les risques d'incendie ou d'électrocution, ne pas exposer cet appareil à la pluie ou à l'humidité.

Afin d'écartier tout risque d'électrocution, garder le coffret fermé. Ne confier l'entretien de l'appareil qu'à un personnel qualifié.

Lors de l'installation de l'appareil, incorporer un dispositif de coupure dans le câblage fixe ou brancher la fiche d'alimentation dans une prise murale facilement accessible proche de l'appareil. En cas de problème lors du fonctionnement de l'appareil, enclencher le dispositif de coupure d'alimentation ou débrancher la fiche d'alimentation.

WARNUNG

Um die Gefahr von Bränden oder elektrischen Schlägen zu verringern, darf dieses Gerät nicht Regen oder Feuchtigkeit ausgesetzt werden.

Um einen elektrischen Schlag zu vermeiden, darf das Gehäuse nicht geöffnet werden.

Überlassen Sie Wartungsarbeiten stets nur qualifiziertem Fachpersonal.

Beim Einbau des Geräts ist daher im Festkabel ein leicht zugänglicher Unterbrecher einzufügen, oder der Netzstecker muss mit einer in der Nähe des Geräts befindlichen, leicht zugänglichen Wandsteckdose verbunden werden. Wenn während des Betriebs eine Funktionsstörung auftritt, ist der Unterbrecher zu betätigen bzw. der Netzstecker abzuziehen, damit die Stromversorgung zum Gerät unterbrochen wird.

CAUTION

The apparatus shall not be exposed to dripping or splashing. No objects filled with liquids, such as vases, shall be placed on the apparatus.

The unit is not disconnected from the AC power source (mains) as long as it is

connected to the wall outlet, even if the unit itself has been turned off.

ATTENTION

Eviter d'exposer l'appareil à un égouttement ou à des éclaboussures. Ne placer aucun objet rempli de liquide, comme un vase, sur l'appareil.

Cet appareil n'est pas déconnecté de la source d'alimentation secteur tant qu'il est raccordé à la prise murale, même si l'appareil lui-même a été mis hors tension.

VORSICHT

Das Gerät ist nicht tropf- und spritzwassergeschützt. Es dürfen keine mit Flüssigkeiten gefüllten Gegenstände, z. B. Vasen, darauf abgestellt werden.

Solange das Netzkabel an eine Netzsteckdose angeschlossen ist, bleibt das Gerät auch im ausgeschalteten Zustand mit dem Stromnetz verbunden.

For the customers in the U.S.A.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

All interface cables used to connect peripherals must be shielded in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules.

Features

The DWZ series is a digital wireless system that combines Sony's consistently developed superior audio technology, highly reliable wireless technology, and state-of-the-art digital signal processing technology. Using an unlicensed 2.4 GHz band, the system provides wide-range functionality with simple, user-friendly operability.

By providing a package that is optimized for specific usage environments, the system offers a wireless solution to users ranging from those inexperienced with wireless systems to seasoned professionals.

Superb audio quality

By transmitting audio signals via 24-bit high-quality linear PCM digital transmission, without signal compression, decompression, or similar processing, the system provides superb audio quality and high-bandwidth transmissions that approach that of wired microphones.

High reliability

By allowing you to select from two RF modes based on your intended use and incorporating Sony's unique data processing technology, the system provides highly-reliable wireless transmission in wireless LAN environments. The receiver is equipped with two antennas with the antenna with the best reception status selected automatically via space diversity, providing stable reception with minimized audio breakup and noise occurrences.

DWZ-M50

The DWZ-M50 is a package that includes a handheld microphone (transmitter: ZTX-M01) and a half-rack receiver (receiver:

ZRX-HR50) and is ideal for use with vocals.

ZTX-M01

A microphone designed with a sturdy metal body.

Equipped with a muting function and an attenuator adjustment function, the unit supports a wide range of audio input levels. In addition, the interchangeable microphone unit allows you to use the microphone in a variety of applications.

* The microphone unit's mounting area has a diameter of 31.3 mm and a pitch of 1.0 mm.

ZRX-HR50

A half-rack receiver equipped with large-screen high-resolution color LCD that combines high-functionality with simple operability.

The Best Channel Selection and Clear Channel Scan functions allow quick and easy configuration of safe channels. In addition, the 5-band graphic equalizer allows wide-range audio-quality adjustment. You can also select whether the muting function applies to the UNBALANCED OUTPUT TUNER/AUX connector.

Using the optional RMM-HRD1 Rack Mount Kit allows you to mount the unit on a rack.

DWZ-B30GB

The DWZ-B30GB is a package that includes a body-pack transmitter (transmitter: ZTX-B01) and a compact receiver (receiver: ZRX-C30) and is ideal for use with electric guitars, electric acoustic guitars, electric bass guitars, etc.

ZTX-B01

A transmitter designed with a sturdy metal body.

Equipped with a muting function, an instrument/mic input switching function, and an attenuator adjustment function, the unit supports a wide range of audio input levels. The supplied belt clip can be rotated in 90-degree increments, allowing you to adjust the direction in which the cables extend based on your environment.

ZRX-C30

A compact receiver equipped with an internal antenna that is capable of withstanding rough handling.

Power can be supplied by the supplied 12 V AC adapter, by an external 9 V DC power supply, or by a square 9 V dry cell battery (6LR61). The unit supports power distributors, allowing you to reduce noise caused by battery operation. The cable tone generator also allows you to match the quality of wireless and wired audio. This reduces the amount of equalizer adjustment necessary on the amp side during wireless transmission. The muting function does not affect the TUNER OUT connector, allowing tuning without sound output.

Using the CD-ROM manual

The manual can be read on a computer with Adobe Reader installed.

You can download Adobe Reader free from the Adobe website.

- 1 Open the index.html file in the CD-ROM.
- 2 Select and click on the manual that you want to read.

Note

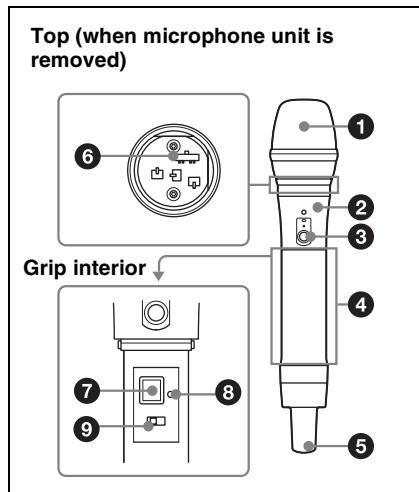

If you have lost or damaged the CD-ROM, you can purchase a new one from your Sony dealer or Sony service counter.

Adobe and Adobe Reader are trademarks of Adobe Systems Incorporated in the United States and/or other countries.

Parts Identification

DWZ-M50

Handheld microphone (transmitter: ZTX-M01)

① Microphone unit

The standard-equipped microphone unit can be interchanged with another interchangeable microphone unit with a diameter of 31.3 mm and a pitch of 1.0 mm.

For details on attaching and removing the microphone unit, see "Replacing the microphone unit" (page 26).

② BATT/MUTING (remaining battery / muting) indicator

Lights when the unit is turned on. This indicates the remaining battery charge and the on/off status of the muting function.

| Indicator | Status |
|-------------------|--|
| Lit (green) | Good |
| Lit (red) | Almost dead |
| Blinking (orange) | Muting function enabled (i.e., audio disabled) |

The remaining battery indication only appears when alkaline dry cell batteries are being used.

③ POWER/MUTING button

Turns the unit on or off. This button can also be used to enable or disable the muting function.

| Function | Button operation |
|-------------------------|--|
| Turn power on | Press the button for at least 1 second |
| Turn power off | Press the button until indicator turns off |
| Enable muting function | Press the button |
| Disable muting function | |

④ Grip

Contains the control buttons, channel display, and battery compartment. Open the grip to configure channel settings and replace the batteries.

For details on opening the grip, see "Inserting Batteries" (page 24).

⑤ Antenna cover

Contains the antenna.

Caution

Do not squeeze the antenna cover. Doing so will weaken the signal that is transmitted, decreasing the transmission range.

⑥ ATT (attenuator) switch

Set the attenuation level based on the sound volume.

| Attenuation level (dB) | When to use |
|------------------------|--|
| 0 | Standard switch position |
| 6 | Set to this position if a red bar occasionally appears in the audio level meter of the receiver. |
| 12 | Set to this position if a red bar always appears in the audio level meter of the receiver. |

The attenuator switch is located at the top of the unit when the microphone unit is removed.

For details on attaching and removing the microphone unit, see “Replacing the microphone unit” (page 26).

⑦ Channel display

Displays the transmission channel. The display disappears after about 10 seconds. You can display it again by pressing the channel selection button.

For details on the channel display, see “Channel Display” (page 32).

⑧ Channel selection button

Allows you to select the RF mode and the transmitting channel.

For details on selecting the RF mode and transmitting channel, see “Configuring the Transmitting Channel Settings” (page 32).

⑨ Button lock switch

Locks the POWER/MUTING button and the channel selection button. This prevents unintentional operations, such as accidentally turning the power off.

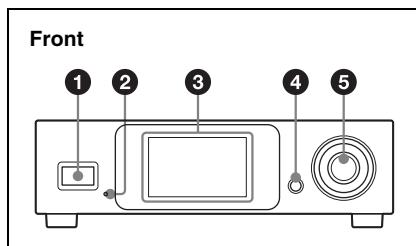

LOCK: Locks the buttons to disable their operation.

UNLOCK: Releases the lock to enable button operation.

Caution

You cannot turn on the unit while this switch is set to the LOCK position, as even the power button is disabled. Set the switch to the UNLOCK position to perform operations.

Half-rack receiver (receiver: ZRX-HR50)

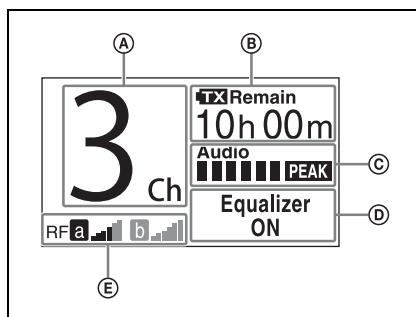

① POWER button

Turns the unit on or off.

② POWER indicator

Lights when the unit is turned on.

③ Display

Displays setting configurations and other information.

Ⓐ Receiving channel indicator

Displays the receiving channel.

⑧ Remaining transmitter battery indicator

Displays the remaining battery charge of the transmitter.

An approximate duration is displayed for the remaining usage time. This duration appears only when signals are being received.

⑨ Audio level meter

Displays the audio level.

Set the audio level so that the yellow or red bar does not appear.

⑩ Equalizer status

Displays the on/off status of the equalizer.

⑪ Receiving level indicator

Displays the reception status of the radio signal.

More bars indicate more stable reception.

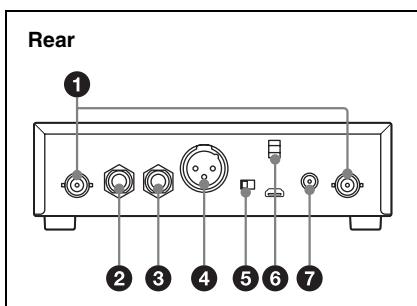

④ ESC (escape) button

Cancels operations, or returns to the main screen from the settings screen.

⑤ Rotary encoder

Allows you to change settings.

For details on changing settings, see “Receiver Settings” (page 28).

① ANTENNA a/b connector (BNC type)

Connect the supplied antenna here.

② UNBALANCED OUTPUT TUNER/AUX (external audio output) connector (headphone jack)

Connect monitoring equipment and similar peripheral devices here.

The audio output from the UNBALANCED OUTPUT TUNER/AUX connector will continue, even if the muting function of the transmitter is enabled. You can enable or disable the audio from this connector via the settings in the receiver’s display.

For details on settings, see “Configuring the transmitter muting function for the UNBALANCED OUTPUT TUNER/AUX connector” (page 30).

For details on connections, see “System Configuration Examples” (page 34).

③ UNBALANCED OUTPUT MAIN (main audio output) connector (headphone jack)

Connect a mixer or an amp here.

For details on connections, see “System Configuration Examples” (page 34).

④ BALANCED OUTPUT connector (XLR type)

Connect a mixer or similar device here.

For details on connections, see “System Configuration Examples” (page 34).

⑤ MIC/LINE (audio output level) selector

Selects the audio output level of the BALANCED OUTPUT connector.

MIC: Sets the audio output level to the mic level.

LINE: Sets the audio output level to the line level.

Caution

Do not set the selector to the LINE position while outputting audio to an audio mixer or similar device. Inputting audio at excessive levels may distort audio or damage the playback/recording device.

⑥ Cable clamp

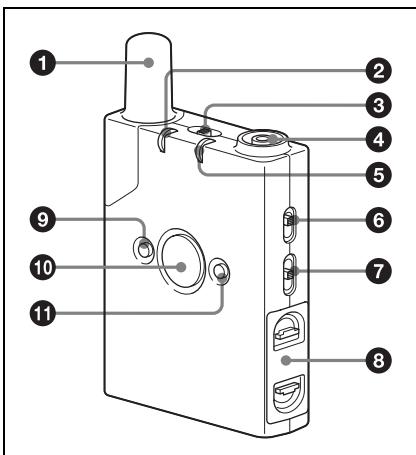

Secures the cable of the supplied AC adapter.

⑦ DC IN 12V (power input) connector

Connect the supplied AC adapter here.

DWZ-B30GB

Body-pack transmitter (transmitter: ZTX-B01)

① Antenna cover

Contains the antenna.

Caution

Do not squeeze the antenna cover. Doing so will weaken the signal that is transmitted, decreasing the transmission range.

② BATT (remaining battery) indicator

Indicates the remaining battery charge when the unit is turned on.

| Indicator | Status |
|-------------|-------------|
| Lit (green) | Good |
| Lit (red) | Almost dead |

The remaining battery indication only appears when alkaline dry cell batteries are being used.

③ Button lock switch

Locks the POWER/MUTING button and the CHANNEL SELECT button. This prevents unintentional operations, such as accidentally turning the power off.

LOCK: Locks the buttons to disable their operation.

UNLOCK: Releases the lock to enable button operation.

Caution

You cannot turn on the unit while this switch is set to the LOCK position, as even the power button is disabled. Set the switch to the UNLOCK position to perform operations.

④ Audio input connector

Connect a guitar or similar instrument here using the supplied guitar cable.

⑤ AUDIO/MUTING indicator

Indicates the input level of the audio signal and the status of the muting function.

| Indicator | Status |
|-------------------|--|
| Lit (green) | Audio input present |
| Lit (red) | Excessive audio input |
| Off | Audio input weak or nonexistent |
| Blinking (orange) | Muting function enabled (i.e., audio disabled) |

⑥ INPUT switch

Set this based on the connected equipment.

INST: Set to this position when a guitar or similar instrument is connected.

MIC: Set to this position when a microphone is connected.

Caution

Do not set the switch to the INST position while outputting audio to an audio mixer or similar device. Inputting audio at excessive levels may distort audio or damage the playback/recording device.

For details on the setting, see “System Configuration Examples” (page 34).

⑦ ATT (attenuator) switch

Set the attenuation level based on the connected equipment.

| Attenuation level (dB) | When to use |
|------------------------|---|
| 0 | Standard switch position |
| 10 | Set to this position if the AUDIO/MUTING indicator on the receiver occasionally lights red. |
| 20 | Set to this position if the AUDIO/MUTING indicator on the receiver is always lit red. |

⑧ Battery compartment

Insert two LR6 (size AA) batteries here.

For details on how to insert batteries, see “Inserting Batteries” (page 24).

⑨ POWER/MUTING button

Turns the unit on or off. This button can also be used to enable or disable the muting function.

| Function | Button operation |
|-------------------------|--|
| Turn power on | Press the button for at least 1 second |
| Turn power off | Press the button until indicator turns off |
| Enable muting function | Press the button |
| Disable muting function | |

⑩ Channel display

Displays the transmission channel. The display disappears after about 10 seconds. You can display it again by pressing the channel selection button.

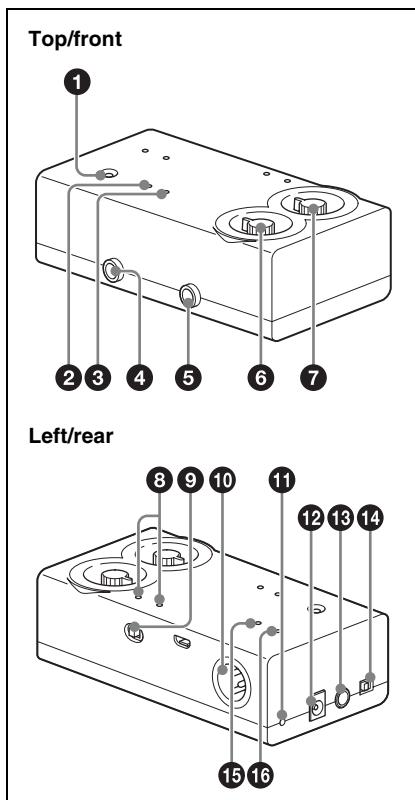

For details on the channel display, see “Channel Display” (page 32).

⑪ CHANNEL SELECT button

Allows you to select the RF mode and the transmitting channel.

For details on selecting the RF mode and transmitting channel, see “Configuring the Transmitting Channel Settings” (page 32).

Compact receiver (receiver: ZRX-C30)

① POWER indicator

Lights when the unit is turned on. When a square 9 V dry cell battery (6LR61) is being used, this also indicates the remaining battery charge.

| Indicator | Status |
|-------------|-------------|
| Lit (green) | Good |
| Lit (red) | Almost dead |

② RF (radio frequency input) indicator

Displays the reception status of the radio signal.

| Indicator | Status |
|-------------|----------------|
| Lit (green) | Reception good |
| Lit (red) | Reception poor |
| Off | No reception |

③ AUDIO indicator

Indicates the status of the audio signal.

| Indicator | Status |
|-------------|---------------------------------|
| Lit (green) | Audio input present |
| Lit (red) | Excessive audio input |
| Off | Audio input weak or nonexistent |

④ TUNER OUT connector (TS phone type)

Connect a tuning meter or similar device here.

Caution

The audio output from the TUNER OUT connector will continue, even if the muting function of the transmitter is enabled.

For details on connections, see "System Configuration Examples" (page 34).

⑤ MAIN OUT connector (TS phone type)

Connect a guitar amp or bass amp here.

For details on connections, see "System Configuration Examples" (page 34).

⑥ CABLE TONE (cable tone generator) switch

Turn the knob to configure the cable tone generator.

For details on the cable tone generator, see "Configuring the cable tone generator" (page 31).

⑦ CHANNEL (channel selection) switch

Turn the knob to select the receiving channel.

The receiving channel will be set to the channel of the RF mode that is selected with the RF MODE switch.

For details on settings, see "Configuring the RF mode and receiving channel" (page 30).

⑧ RF MODE indicators

The indicator of the RF mode that is selected with the RF MODE switch lights.

⑨ RF MODE (RF mode selection) switch

Selects the RF mode.

For details on settings, see "Configuring the RF mode and receiving channel" (page 30).

⑩ BALANCED OUTPUT connector (XLR type)

Connect a mixer or similar device here.

For details on connections, see "System Configuration Examples" (page 34).

⑪ Cable clamp attachment hole

Attach the supplied cable clamp here.

For details on attaching the cable clamp, see "Attaching the cable clamp" (page 27).

⑫ DC IN 9V (power input) connector

Use this to connect to a commercially available 9 V DC power supply unit.

⑬ DC IN 12V (power input) connector

Connect the supplied AC adapter here.

⑭ POWER switch

Turns the unit on or off.

⑮ TX MUTING (transmitter muting indicator)

Indicates the status of the muting function for the transmitter.

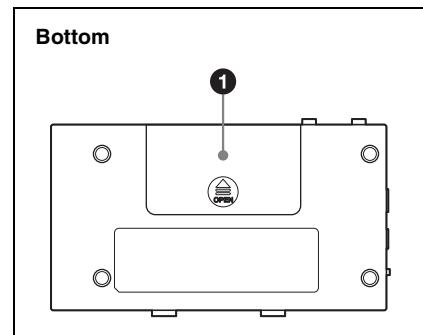

This blinks orange when the muting function is enabled.

⑯ TX BATT (remaining transmitter battery) indicator

Indicates the remaining battery charge of the transmitter.

| Indicator | Status |
|-------------|-------------|
| Lit (green) | Good |
| Lit (red) | Almost dead |

The remaining battery indication only appears when alkaline dry cell batteries are being used.

① Battery compartment

Insert a square 9 V dry cell (6LR61) battery here.

For details on how to insert batteries, see “Inserting Batteries” (page 24).

Power Supply

This section describes the power supply for each device.

For details on how to insert batteries, see “*Inserting Batteries*” (page 24).

Handheld microphone (ZTX-M01), body-pack transmitter (ZTX-B01)

Power supplied by two LR6 (size AA) batteries.

The following types of battery can be used.

- Alkaline dry cell batteries
- Rechargeable nickel-metal hydride batteries
- Lithium batteries

Half-rack receiver (ZRX-HR50)

Power supplied by the supplied AC adapter.

Compact receiver (ZRX-C30)

Power can be supplied by the supplied AC adapter, by a commercially available 9 V DC power supply unit, or by a square 9 V dry cell battery (6LR61).

Priority sequence for power supplies

When multiple power supplies are made available for use, they will be used in the following order of priority.

- ① 12 V power input
- ② 9 V power input
- ③ Square 9 V dry cell battery (6LR61)

Inserting Batteries

CAUTION

Danger of explosion if battery is incorrectly replaced.

Replace only with the same or equivalent type recommended by the manufacturer. When you dispose of the battery, you must obey the law in the relative area or country.

ATTENTION

Il y a danger d’explosion s’il y a remplacement incorrect de la batterie.

Remplacer uniquement avec une batterie du même type ou d’un type équivalent recommandé par le constructeur.

Lorsque vous mettez la batterie au rebut, vous devez respecter la législation en vigueur dans le pays ou la région où vous vous trouvez.

VORSICHT

Explosionsgefahr bei Verwendung falscher Batterien. Batterien nur durch den vom Hersteller empfohlenen oder einen gleichwertigen Typ ersetzen.

Wenn Sie die Batterie entsorgen, müssen Sie die Gesetze der jeweiligen Region und des jeweiligen Landes befolgen.

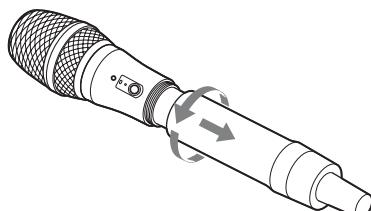

Note

Replacing the batteries during operation will result in high noise. Be sure to turn off the unit before replacing the batteries.

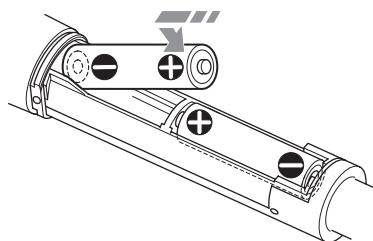

Handheld microphone (ZTX-M01)

1 Press and hold the POWER/MUTING button to turn off the unit.

2 Turn the grip in the direction of the arrow, and pull down the grip until the battery compartment is shown.

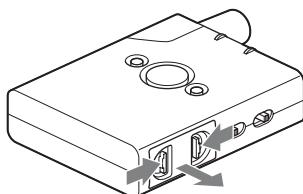

- 3** Insert two new LR6 (size AA) batteries while making sure the polarities are correct.

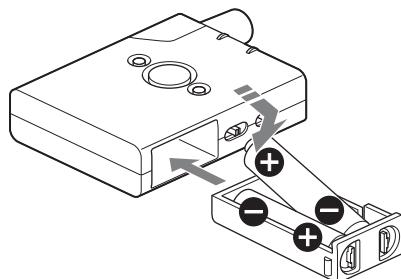

- 4** Close the grip and turn it in the reverse direction in the step **2** above.

Body-pack transmitter (ZTX-B01)

- 1** Press and hold the POWER/MUTING button to turn off the unit.
- 2** Slide the battery-compartment catches inward (in the direction of the arrows → ←) to take out the compartment.

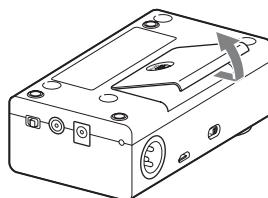

- 3** Insert two new LR6 (size AA) batteries into the battery compartment while making sure the polarities are correct, and then reinser the compartment into the unit.

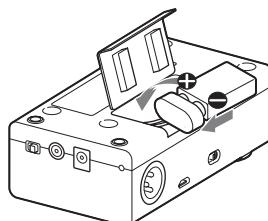

Compact receiver (ZRX-C30)

- 1** Set the POWER switch to the OFF position to turn off the unit.
- 2** Slide open the battery compartment cover at the bottom of the device.

- 3** Connect the new square 9 V dry cell (6LR61) battery to the unit's battery snap while making sure the polarities are correct, and then insert the battery into the compartment.

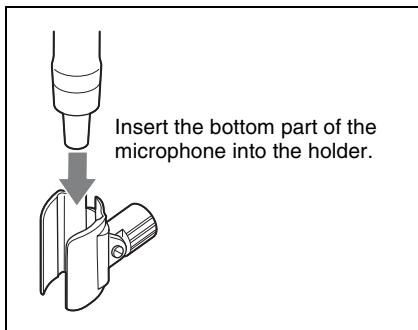

- 4** Close the battery compartment.

Attaching the Supplied Accessories

This section describes how to attach the supplied accessories to each unit.

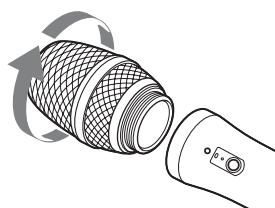

Attaching the Supplied Accessories to the Handheld Microphone (ZTX-M01)

Attaching the microphone holder

Replacing the microphone unit

To remove the microphone unit

Turn the microphone unit in the direction of the arrow.

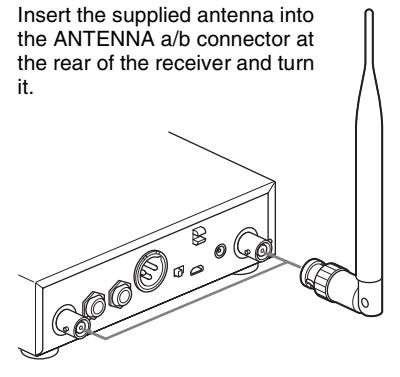

To attach the microphone unit

Turn the microphone unit in the opposite direction from when you removed it, and make sure that the unit is securely attached to the microphone.

Attaching the Supplied Accessories to the Half-Rack Receiver (ZRX-HR50)

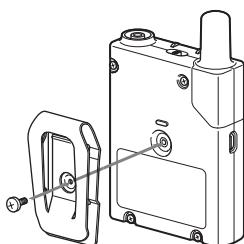

Attaching the antenna

Insert the supplied antenna into the ANTENNA a/b connector at the rear of the receiver and turn it.

Attaching the Supplied Accessories to the Body-Pack Transmitter (ZTX-B01)

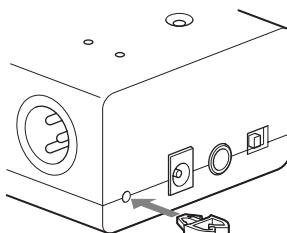

Attaching the belt clip

Align the mounting hole at the rear of the transmitter with the hole in the middle of the supplied belt clip, and secure the belt clip using the supplied belt clip screw. You can also rotate the belt clip 180 degrees or 90 degrees to the left or right before securing it.

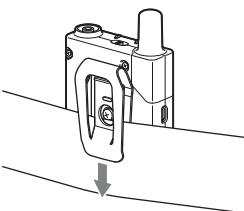

Attaching the Supplied Accessories to the Compact Receiver (ZRX-C30)

Attaching the cable clamp

Insert the cable clamp into the cable clamp attachment hole on the left side of the receiver.

To attach to a guitar strap

Slide the guitar strap into the belt clip on the unit completely, and make sure it is secure.

Caution

Depending on the thickness and width of the strap, the belt clip may not attach securely.

Receiver Settings

Half-Rack Receiver (ZRX-HR50)

Use the rotary encoder and the ESC button to configure settings on the ZRX-HR50 half-rack receiver. Perform setting operations as follows.

Confirm: Press the rotary encoder.

Move cursor: Turn the rotary encoder.

Cancel: Press the ESC button.

Displaying the settings menu

Press the rotary encoder to display the [Setup] screen in the display.

To return to the main screen from the [Setup] screen, press the ESC button.

Configuring the receiving channel settings

Two RF modes (channel modes), wide band and narrow band, are available on the DWZ.

Each RF mode consists of six channels.

Select the appropriate channel according to your intended use.

| RF mode | Transmitting channel number | Description |
|----------------------|-----------------------------|---|
| Wide band (WIDE) | 1/2/3/4/5/6 | This mode reduces any interference to other wireless equipment. |
| Narrow band (NARROW) | a/b/c/d/e/f | This mode uses the Clear Channel Scan function, making it useful for avoiding any interference from other wireless equipment. |

Caution

When using multiple channels (up to six), the two RF modes, wide band and narrow band, cannot be used simultaneously. Select only one RF mode during use.

To select the RF mode

- 1 In the [Setup] screen, select [Advanced Settings].
- 2 Select [RF Mode Settings].
The [RF Mode Settings] screen appears.
- 3 Select [Wide Band] or [Narrow Band].
When the configuration is complete, the main screen appears again.

To select the channel

- 1 In the [Setup] screen, select [Channel Setup].

The [Channel Setup] screen appears.

- 2 Specify the channel using one of the following methods.

A Select [Best Channel Selection]

The channel with the least interference will be configured automatically.

B Select [Clear Channel Scan]

The status of all the channels in the selected RF mode will be displayed, allowing you to select the channel you want to use. If there are no open channels, "No Clear Channel" appears.

| Display | Status |
|-------------------------|--|
| White font (underlined) | Channel with low interference. |
| White font | Channel with relatively low interference. |
| Gray font | Channel with high interference, or channel that is being used by another device. |
| "No Clear Channel" | No usable channels available. |

C Select [Manual Setup]

Configure the channel manually.

Select the channel you want to use.

This completes the configuration, and the main screen appears again.

Caution

If you change the channel setting, be sure to change the channel setting on the transmitter to the same channel. If the receiver channel and transmitter channel are not identical, audio will not be output.

Configuring the equalizer

- 1 In the [Setup] screen, select [Audio Setup].

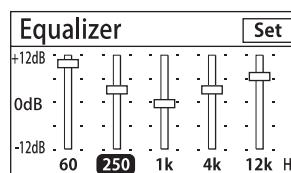

The [Audio Setup] screen appears.

- 2 Select [Equalizer].

The [Equalizer] screen appears.

- 3 Select [ON] to enable the equalizer function, or [OFF] to disable it.

If you select [ON], the equalizer settings screen appears.

If you select [OFF], configuration is complete and the main screen appears again.

- 4 Select the frequency for which you want to adjust the level, and adjust the setting.

5 Select [Set].

The setting value is saved.

To cancel the setting, press the ESC button.

regardless of whether the muting function of the transmitter is enabled or disabled.

This completes the configuration, and the main screen appears again.

Configuring the transmitter muting function for the UNBALANCED OUTPUT TUNER/AUX connector

You can select whether the muting function of the transmitter will be applied to the audio output of the UNBALANCED OUTPUT TUNER/AUX (external audio output) connector.

Caution

The audio output from the UNBALANCED OUTPUT TUNER/AUX connector will continue, even if the muting function of the transmitter is enabled. To disable the audio output from the UNBALANCED OUTPUT TUNER/AUX connector, enable the TX Muting function.

- 1 In the [Setup] screen, select [Audio Setup].

The [Audio Setup] screen appears.

- 2 Select [AUX/Tuner Out Settings].

The [AUX/Tuner Out Settings] screen appears.

- 3 Select whether to enable the muting function.

TX Muting Valid: Enables the TX Muting function. The audio output from the connector is disabled when the muting function of the transmitter is enabled.

TX Muting Invalid: Disables the TX Muting function. The audio output from the connector will continue,

Configuring the battery type

Specify the type of battery that is being used in the transmitter so that the transmitter's remaining battery charge can be displayed properly on this unit.

- 1 In the [Setup] screen, select [Advanced Settings].

- 2 Select [Battery Type].

- 3 Select the battery type.

Alkaline: Alkaline dry cell batteries are being used in the transmitter.

Ni-MH: Rechargeable nickel-metal hydride batteries are being used in the transmitter.

Lithium: Lithium batteries are being used in the transmitter.

This completes the configuration, and the main screen appears again.

Compact Receiver (ZRX-C30)

Configuring the RF mode and receiving channel

Two RF modes (channel modes), wide band and narrow band, are available on the DWZ.

Each RF mode consists of six channels. Select the appropriate channel according to your intended use.

| RF mode | Transmitting channel number | Description |
|----------------------|------------------------------------|---|
| Wide band (WIDE) | 1/2/3/4/5/6 | This mode reduces any interference to other wireless equipment. |
| Narrow band (NARROW) | a/b/c/d/e/f | This mode reduces any interference from other wireless equipment. |

Configuring the cable tone generator

The cable tone generator is a function that modifies sound properties to simulate the quality of a wired cable connection.

You can simulate the sound quality of a cable that is 1 m to 25 m in length by setting the CABLE TONE switch to the corresponding number (m).

Supposed cable length (m): OFF/1/3/5/8/
12/18/25

Caution

When using multiple channels (up to six), the two RF modes, wide band and narrow band, cannot be used simultaneously. Select only one RF mode during use.

- 1** Set the RF MODE (RF mode selection) switch to WIDE or NARROW.
- 2** Turn the CHANNEL (channel selection) switch to set the receiving channel.

Caution

If you change the channel setting, be sure to change the channel setting on the transmitter to the same channel. If the receiver channel and transmitter channel are not identical, audio will not be output.

Transmitter Settings

Configuring the Transmitting Channel Settings

Two RF modes (channel modes), wide band and narrow band, are available on the DWZ.

Each RF mode consists of six channels. Select the appropriate channel according to your intended use.

| RF mode | Transmitting channel number | Description |
|----------------------|-----------------------------|---|
| Wide band (WIDE) | 1/2/3/4/5/6 | This mode reduces any interference to other wireless equipment. |
| Narrow band (NARROW) | a/b/c/d/e/f | This mode uses the Clear Channel Scan function, making it useful for avoiding any interference from other wireless equipment. |

Caution

When using multiple channels (up to six), the two RF modes, wide band and narrow

band, cannot be used simultaneously. Select only one RF mode during use.

Selecting the RF mode

- 1 Press and hold the POWER/MUTING button to turn off the unit.
- 2 Press and hold the POWER/MUTING button (about 1 second) while holding down the channel selection button.
“0” blinks in the channel display.
- 3 Press the channel selection button to select “1” or “a.”
- 4 Press the POWER/MUTING button.

Selecting the channel

- 1 Press and hold the channel selection button while the unit is turned on.
The channel display blinks.
- 2 Press the channel selection button to select the channel.
- 3 Press and hold the channel selection button to apply the channel selection.

Caution

If you change the channel setting on the transmitter, be sure to change the channel setting on the receiver to the same channel. If the receiver channel and transmitter channel are not identical, audio will not be output.

Channel Display

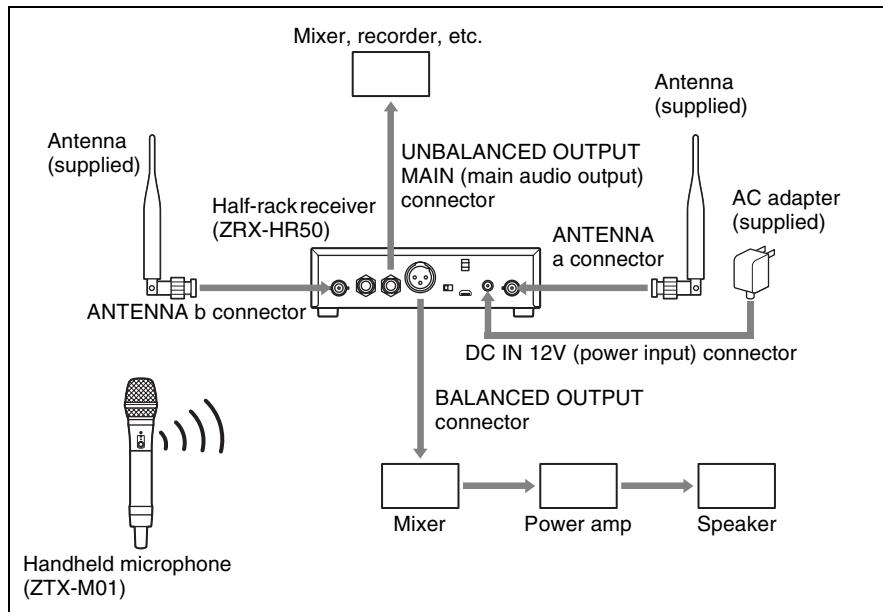

Each channel will appear as follows in the transmitter's channel display.

| RF mode | Channel number | | |
|----------------------------|----------------|---|---|
| Wide band (WIDE) | 1 | 2 | 3 |
| | 4 | 5 | 6 |
| Narrow band (NARROW) | a | b | c |
| | d | e | f |

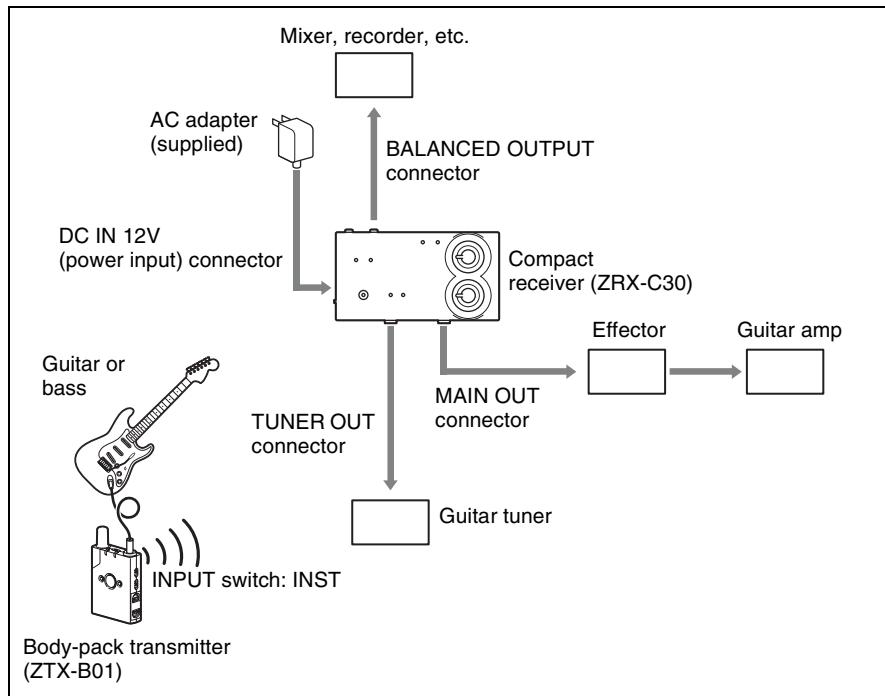

System Configuration Examples

The following system configuration examples are of the DWZ series.

Configuration Examples for the DWZ-M50

Configuration Example for the DWZ-B30GB

Troubleshooting

Check the following if problems occur.

Should any problem persist, consult your Sony dealer.

| Symptom | Meanings | Remedy |
|------------------------------|--|--|
| The unit does not turn on. | The polarity orientation of the batteries in the battery compartment is incorrect. | Insert the batteries with the correct polarity orientation. |
| | The batteries are exhausted. | Replace the batteries with new ones. |
| | Button operations are locked. | Set the button lock switch to UNLOCK. |
| The batteries drain quickly. | The batteries are exhausted. | Replace the batteries with new ones. |
| | Manganese batteries are being used. | Use alkaline batteries. The battery life of a manganese battery is less than half that of an alkaline battery. |
| | The unit is being used under cold conditions. | The batteries drain quickly under cold conditions. |
| There is no sound. | The RF mode or channel setting on the transmitter is different from that on the receiver. | Use the same RF mode and channel setting on both the transmitter and the receiver. |
| The sound is weak. | The attenuation level on the transmitter is too high. | The input level is low. Set the attenuation level on the transmitter to the appropriate level. |
| | The output level of the receiver does not match the input level setting of the connected device. | Set the MIC/LINE selector according to the input level of the connected device (ZRX-HR50). |

| Symptom | Meanings | Remedy |
|--|--|--|
| The sound is distorted. | The attenuation level of the transmitter is too low. | The audio input level is too high. Set the attenuation level on the transmitter to a level where sound is not distorted. |
| | The transmitter is set to MIC input. | The audio input level is too high. Specify INST input. |
| | The output level of the receiver does not match the input level setting of the connected device. | Set the MIC/LINE selector according to the input level of the connected device (ZRX-HR50). |
| Noise occurs. | The transmitter and receiver are far away from each other. | Shorten the distance between the transmitter and receiver until audio breakup does not occur. |
| | Signal interference from other devices is occurring. | Change the selected channel, or move the devices that are causing interference away from the unit. |
| The service area (i.e., operating range) is small. | Two or more transmitters are set to the same channel. | Do not use the same channel for more than one transmitter. |
| | The antenna is not attached to the receiver. | Attach the supplied antenna. |
| | Wide band and narrow band are being used simultaneously. | When using multiple channels simultaneously, use channels from a single RF mode, either wide mode or narrow mode. |
| The audio quality is abnormal. | The cable tone generator setting is incorrect. | Set the cable tone generator to a suitable setting (ZRX-C30). |
| | The equalizer setting is incorrect. | Set the equalizer to a suitable setting (ZRX-HR50). |
| The unit does not turn off when the POWER switch is pressed. | Button operations are locked. | Set the button lock switch to UNLOCK. |
| | The RF mode is being configured. | The unit cannot be turned off while RF mode configuration is in progress (ZTX-M01/B01). |
| Channels cannot be changed. | Button operations are locked. | Set the button lock switch to UNLOCK. |
| | The settings menu is not open. | Follow the instructions in “Displaying the settings menu” and “Configuring the receiving channel settings” (page 28) to configure settings (ZRX-HR50). |

| Symptom | Meanings | Remedy |
|---|---------------------------------|--|
| The RF indicator on the receiver lights even when the transmitter is off. | Interference is being received. | Set the receiver to a channel for which the RF indicator does not light, and then set the transmitter to the same channel. |

Important Notes on Use

The operating range of the 2.4 GHz band used by the units may be reduced and noise may occur due to interference from the operating environment or from other wireless stations. In such cases, moving the units away from other wireless stations or changing the channel may resolve the problem.

- If other wireless stations are being used nearby, distance the units from the stations as much as possible, or change the channel or RF mode being used.
- If this does not resolve the problem, try turning off the other wireless stations (i.e., stopping their radio signals) one by one.

Caution

To prevent audio noise caused by interference from other transmitters or by excessive RF inputs, maintain a distance of at least 30 cm between the transmitter and the receiver.

Usage and Storage

- Operating the DWZ series components near electrical equipment (motors, transformers, or dimmers) may cause it to be affected by electromagnetic induction. Keep the DWZ series components as far from such equipment as possible.
- The presence of the lighting equipment may produce electrical interference over the entire frequency range. Position the DWZ series components so that interference is minimized.

Cleaning

Clean the surface and the connectors of the DWZ series components with a dry, soft cloth. Never use thinner, benzene, alcohol or any other chemicals, since these may mar the finish.

To prevent electromagnetic interference from portable communication devices

The use of portable telephones and other communication devices near the DWZ series components may result in malfunction and interference with audio signals. It is recommended that portable communication devices near the DWZ series components be turned off.

Specifications

Design and specifications are subject to change without notice.

Note

Always verify that the unit is operating properly before use. SONY WILL NOT BE LIABLE FOR DAMAGES OF ANY KIND INCLUDING, BUT NOT LIMITED TO, COMPENSATION OR REIMBURSEMENT ON ACCOUNT OF THE LOSS OF PRESENT OR PROSPECTIVE PROFITS DUE TO FAILURE OF THIS UNIT, EITHER DURING THE WARRANTY PERIOD OR AFTER EXPIRATION OF THE WARRANTY, OR FOR ANY OTHER REASON WHATSOEVER.

DWZ-M50

Carrier frequencies

2402.0 MHz to 2478.5 MHz

Occupied RF bandwidth

2.5 MHz

Type of emission

F1D and F1E

Modulation method

GFSK

Operating temperature

0 °C to 50 °C (32 °F to 122 °F)

Storage temperature

-20 °C to +60 °C (-4 °F to +140 °F)

Handheld microphone (ZTX-M01)

RF output level

10 mW (e.i.r.p.)

Antenna

λ/4 monopole antenna

Microphone type

Dynamic: unidirectional

Frequency response

Transmission: 10 Hz to 22 kHz

Microphone unit: 70 Hz to 16 kHz

Maximum input level

142 dB SPL (when attenuator level is 12 dB)

Dynamic range

102 dB (A-weighted)

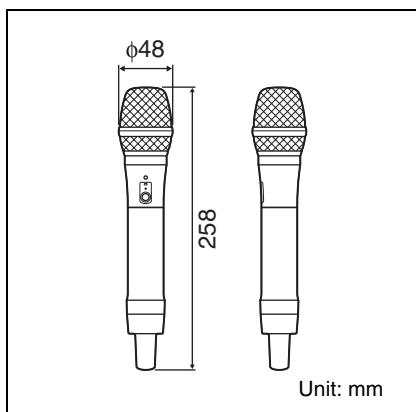

Power requirements

3.0 V DC (two LR6 (size AA) alkaline dry cell batteries)

Battery life

Approx. 10 hours of continuous use
(25 °C (77 °F) ambient temperature, Sony LR6 (size AA) alkaline dry cell batteries)

Dimensions

φ 48 × 258 mm (1 15/16 × 10 1/4 inches) (diameter/length)

Mass Approx. 305 g (11 oz.) (including batteries)

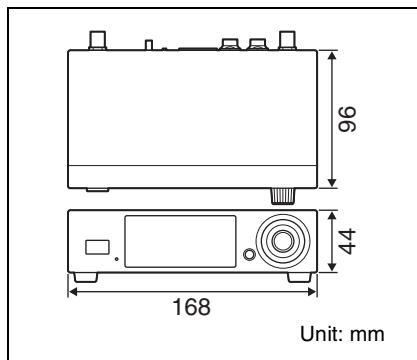

Half-rack receiver (ZRX-HR50)

Reception type

Space diversity

ANTENNA a/b connector
 BNC-R, 50 Ω
 Frequency response
 10 Hz to 22 kHz
 Maximum output level
 Balanced Output
 MIC: -22 dBu
 LINE: +24 dBu
 Unbalanced Output: +8 dBu
 Reference output level
 Balanced Output
 MIC: -58 dBu
 LINE: -12 dBu
 Unbalanced Output: -28 dBu
 Power requirements
 External DC input: 12 V DC
 Consumption current (during 12 V DC
 input)
 220 mA

Dimensions

168 × 44 × 96 mm (6 $\frac{5}{8}$ × 1 $\frac{3}{4}$ ×
 3 $\frac{7}{8}$ inches) (w/h/d)
 Mass Approx. 510 g (1 lb. 2.0 oz.)

Modulation method
 GFSK
 Operating temperature
 0 °C to 50 °C (32 °F to 122 °F)
 Storage temperature
 -20 °C to +60 °C (-4 °F to +140 °F)

Body-pack transmitter (ZTX-B01)

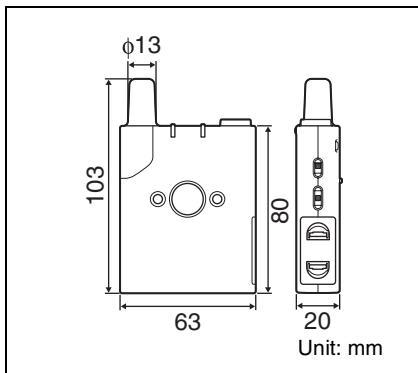

RF output level
 10 mW (e.i.r.p.)
 Antenna
 λ/4 monopole antenna
 Frequency response
 10 Hz to 22 kHz
 Maximum input level
 MIC: -22 dBu
 INST: +8 dBu
 (when attenuator level is 0 dB)
 Reference input level
 MIC: -58 dBu
 INST: -28 dBu
 (when attenuator level is 0 dB)

Dynamic range
 MIC: 102 dB (A-weighted)
 INST: 98 dB (A-weighted)
 Power requirements
 3.0 V DC (two LR6 (size AA)
 alkaline dry cell batteries)
 Battery life
 Approx. 10 hours of continuous use
 (25 °C (77 °F) ambient
 temperature, Sony LR6 (size
 AA) alkaline dry cell batteries)

DWZ-B30GB

Carrier frequencies
 2402.0 MHz to 2478.5 MHz
 Occupied RF bandwidth
 2.5 MHz
 Type of emission
 F1D and F1E

Dimensions

$63 \times 80 \times 20$ mm ($2\frac{1}{2} \times 3\frac{1}{4} \times \frac{13}{16}$ inches) (w/h/d) (excluding the antenna)

Mass Approx. 156 g (5.5 oz.) (including batteries)

Compact receiver (ZRX-C30)

Reception type

Space diversity

Antenna

Internal $\lambda/4$ monopole antenna

Frequency response

10 Hz to 22 kHz

Maximum output level

Balanced Output: +16 dBu

Main/Tuner Output: +8 dBu

Reference output level

Balanced Output: -20 dBu

Main/Tuner Out: -28 dBu

Power requirements

External DC input: 12 V DC / 9 V DC

Dry cell battery: Square 9 V
alkaline dry cell battery
(6LR61)

Consumption current

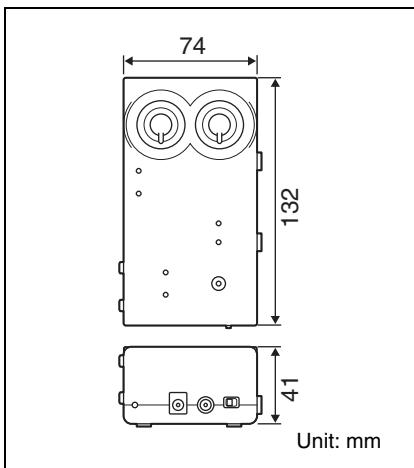

During 12 V DC input: 90 mA
During 9 V DC input: 120 mA

Battery life

Approx. 3.5 hours of continuous
use (25 °C (77 °F) ambient)

temperature, Sony square 9 V
alkaline dry cell battery)

Dimensions

$132 \times 41 \times 74$ mm ($5\frac{1}{4} \times 1\frac{5}{8} \times 3$ inches) (w/h/d)

Mass Approx. 205 g (7.2 oz.)
