

JAMSTANDS™

by Ultimate Support

On stage, behind the board, or in the studio, sometimes you need your rack to roll with you. The Rolling Rack Stand easily accommodates, boasting an 11U-over-8U rack on casters, two of which lock to keep your rack from rolling away. The top section is angle-adjustable for convenience, and the frame is built from rugged steel for durability.

SETUP INSTRUCTIONS — JS-SRR100

PARTS INCLUDED:

- A. (3) Cross bars
- B. (2) Side angle bars with wheels
- C. (1) Top rack
- D. (1) Allen wrench (Tool)
- E. (2) Tightening knobs
- F. (6) Large screws
- G. (6) Washers
- H. - Bag of small screws & mounting clips

- STEP 1.**
- Using large screws, washers, and allen wrench attach all three cross bars to one of the side angle bars with wheels. Make sure mounting holes are on the inside.

- STEP 2.**
- Line up all three cross bars with other side and hand tighten large screws with washers. After all three bars have been attached use an allen wrench to finish tightening.

- STEP 3.**
- Attach top rack to assembled rack by lining up rotating links over each other. Start with one side and snap the other into place.

- STEP 4.**
- Screw in tightening knobs to both sides. These are used to adjust top rack to desired angle.

- STEP 5.**
- Use a flat head screw driver too attach mounting brackets. Use small screws to attach equipment to mounting brackets.
