 VELLO™

INTRODUCTION

Thank you for choosing a Vello Lens Adapter. Vello lens adapters allow you to use lenses from manufacturers other than the maker of your camera body, so you can mount a lens on a camera body with which it would otherwise be incompatible. Vello Lens Adapters fit securely to the lens, but not so tightly that they are difficult to remove. Please follow these instructions to mount and remove your Vello Lens Adapter.

Although the lens will fit physically, automatic diaphragm (AE metering), and other functions dependent on communication between the camera body and lens, will be disrupted by a lens adapter. You will need to set exposures manually or meter in aperture priority (stop-down) mode. Focusing to infinity is retained.
