

# LENS HOOD

THANK YOU FOR CHOOSING VELLO

The Vello Lens Hood with Filter Access Panel is custom-tailored to your camera's lens. The lens hood mounts directly to your lens and accommodates its exact angle of view. It prevents glare and lens flare by blocking stray light. It also adds shock absorption to help protect your lens from impact damage. The filter access panel can be removed, enabling you to rotate your filter without removing the lens hood.

## USING THE FILTER ACCESS PANEL

**Tip:** The filter access panel is easier to remove when the lens hood is mounted to your camera.

1. Grasp the filter access panel from both sides using your thumb and index finger.
2. Remove the panel by pushing it toward the camera body, in the direction of the arrow (see illustration).

3. Insert your finger through the open space to rotate your filter as desired.
4. Reattach the filter access panel when you have finished using it.
