## INTRODUCTION

Thank you for choosing a Vello Lens Adapter. The Vello C mount adapter allows you to mount photo lenses to your camera. Vello Lens Adapters fit securely to the lens, but not so tightly that they are difficult to remove. Please follow these instructions to mount and remove your Vello Lens Adapter.

*Although the lens will fit physically, automatic diaphragm (AE metering) and other functions dependent on communication between the camera body and lens will be disrupted by a lens adapter. You will need to set exposures manually or meter in aperture priority (stop-down) mode. Focusing to infinity is retained.*

*All images are for illustrative purposes only.*

## TO MOUNT THE LENS ADAPTER

1. Rotate the lens adapter clockwise onto the camera until it is secure.

2. Line up the alignment dots on the lens and the lens adapter.

**3.** Rotate the lens until it locks into place.

**4.** If desired, you can re-align the lens to a specific position. To re-align the lens, use a 2 mm flat-head screwdriver to loosen the three screws on the lens mount. Rotate the lens to the desired position, and tighten the three screws.
