

Glare-Free Screen Protector Kit

User Manual

Introduction

Thank you for choosing Xuma.

Congratulations on the purchase of your Xuma iPad Screen Protector. This screen protector is designed to protect your iPad's screen from scratches, dust, and smears. It's easy to apply and remove, and it adheres to the screen without leaving behind any sticky residue.

Instructions

1. Remove any films or other intervening substances from your iPad's screen.
2. Use the included microfiber cleaning cloth to clean your iPad's screen, making sure to remove any dust and fingerprints.
3. Partially peel off mask 1 from the screen protector. Be sure not to touch the exposed side of the screen protector.
4. Make sure your iPad is on a stable surface, and align the screen protector with your iPad. Make sure the cutout for the home button is properly aligned.
5. Hold the screen protector up by mask 1 while gently pushing down on the screen protector with the included paper applicator. As you push the paper applicator further down the screen of the iPad to apply the screen protector, mask 1 will gradually peel off.
6. Use the paper applicator to smooth out any remaining air bubbles by pushing them out to the edge of the screen protector.
7. Peel off mask 2 from the screen protector.
