USER MANUAL

## THANK YOU FOR CHOOSING ZIV.

The Ziv RAVF right-angle viewfinder is an accessory for photographers who want to stay in a comfortable position while shooting subjects that are at low or inconvenient angles.

Magnification can be easily switched from 1.25x for normal viewing to 2.5x to facilitate precision focusing of your camera. The eyepiece rotates a full 360 degrees and allows for capturing an image at your most comfortable angle. An integrated adjustable diopter allows for focusing the image in the viewfinder
